

Devastating Fire Guts 40 Shops in Baghajatin's Ramgarh Market

Another major fire has struck Kolkata, this time reducing the bustling Ramgarh Market in Baghajatin to ashes. At least 40 shops were completely gutted in the devastating blaze. Although the fire has largely been brought under control, several pockets of flames are still being extinguished by firefighters. The exact cause of the fire is yet to be confirmed, but initial investigations suggest that a short circuit in one of the tailoring shops may have triggered the incident. Overnight, traders suffered losses amounting to several lakhs of rupees, leaving them deeply distressed. The fire broke out around 1:30 am on the early hours of Friday. Within minutes, flames engulfed large sections of the Ramgarh Market. Locals first spotted the blaze and immediately alerted the fire department. Multiple fire tenders rushed to the spot and began firefighting operations. **PG 3**

Mamata Banerjee expressed sadness at the demise of Shivraj Patil

Mi News Service, Kolkata : West Bengal Chief minister Mamata Banerjee expressed her sadness at the passing away of veteran public leader, former Speaker of the Lok Sabha and former Union Home Minister Shivraj Patil in Maharashtra on Friday.

In a condolence message in her social media platform X, Mamata Banerjee recalling her association with Shivraj Patil, said I “remember my days of interactions with him on various issues during my tenures as Union Minister and also as a Parliamentarian in the Lok Sabha”.

In her message she wrote ,” Saddened by the demise of veteran public leader, former Speaker of Lok Sabha and former Union Home Minister Shivraj Patil. I remember my days of interactions with him on various issues during my tenures as Union Minister and also as a Parliamentarian in Lok Sabha. My condolences to his bereaved family, friends and followers”.

Rs 45 cr drugs, gold and diamonds seized at Mumbai airport; 12 held

Mi News Service, Mumbai : In one of the largest hauls in recent times, the Customs officials here have seized diamonds, gold and hydroponic weed, collectively valued at Rs 45 crore, before they were being smuggled through the airport, official sources said adding that 12 passengers have also been arrested in this connection. The seizures were made during the week long operations conducted till December 11 at Mumbai's Chhatrapati Shivaji Maharaj International Airport, they said. Based on specific information, the Customs personnel apprehended nine passengers and recovered hydroponic weed better known as 'marijuana' and valued at Rs 37.26 crore in international market from them, an official said on Wednesday. In some cases, the contraband was

Messi's India Tour set to dazzle, but without his 2011 football magic

Mi News Service, Kolkata / Mumbai / New Delhi : Argentine superstar Lionel Messi's long-awaited return to India, after a magical maiden visit back in 2011, will be high on glitz but low on actual football, promising a spectacle that may not recapture the raw sporting frenzy that once shook the Salt Lake Stadium here. His artistry in a competitive match will be missing this time. It would be quite unlike 2011 when more than 85,000 fans packed the stadium, some even perched on terrace edges, to watch Argentina edge Venezuela 1-0 in a FIFA friendly. The eight-time Ballon d'Or winner is not scheduled to play serious football on the 'G.O.A.T. India Tour 2025'. It is a fully promotional, and commercially-curated event which will begin on Saturday here and wind up on Monday in New Delhi. This time Messi returns to India for a high-profile, non-competitive tour across Kolkata, Hyderabad, Mumbai, and Delhi, featuring promo-

IndiGo board appoints external aviation expert for probing service disruption

Mi News Service, Mumbai : IndiGo's board on Friday announced the appointment of an external aviation expert to carry out a root-cause analysis of its recent massive flight disruptions. "Chief Aviation Advisors LLC, led by Captain John Illson, veteran aviation expert, to conduct an independent expert review and assessment of the recent operational disruption and the contributing factors," the airline said in a statement. The board of Inter Globe Aviation, the parent of IndiGo, has already set up a crisis management group in the wake of the significant operational disruptions that started on December 2.

The announcement comes on the day IndiGo Chief Executive Officer Pieter Elbers and Chief Operating Officer, Isidre Porqueras are being grilled before a four-member panel, set up by the Directorate General of Civil Aviation with a mandate to identify the root

Former HM Shivraj Patil passed away, Rajya Sabha pays tributes

“The country has lost an experienced statesman, an able administrator and a respected parliamentarian. We deeply mourn the passing away of Shri Shivraj Patilji

--C P Radhakrishnan

Mi News Service, New Delhi : Rajya Sabha on Friday paid tributes to former Union Home Minister Shivraj Patil, who passed away this morning, with Chairman C P Radhakrishnan saying that the country has lost a respected parliamentarian and an able administrator.

Patil served as a member of the Rajya Sabha, representing the state of Maharashtra, from 2004 to 2010. "I refer, with profound sorrow, to the passing away of Shivraj Patil Ji, a former member of this house who passed away today at the age of 90 years," Radhakrishnan said during the Zero Hour proceedings in the morning. The veteran Congressman and former Union Home Minister passed away at his home town Latur in Maharashtra on Friday morning. "The country has lost an experienced statesman, an able administrator and a respected parliamentarian. We deeply mourn the passing away of Shri Shivraj Patilji," Radhakrishnan added. Members observed a two minutes silence as a

mark of respect to the memory of the departed.

"Born on October 12, 1935, Shivraj Patil Ji was an eminent public figure who held several important constitutional and parliamentary positions during his long and distinguished career. He served as the 10th speaker of Lok Sabha and later as the Union Minister of Home Affairs," Radhakrishnan said. Patil also served as the Governor of Punjab and the administrator of the Union Territory of Chandigarh. "A dignified and soft-spoken statesman, Shivraj Patil was widely respected for his deep understanding of parliamentary procedure, his unwavering commitment to democratic values and his calm and measured approach to public life. His contributions to the proceedings of this house and to the nation's governance remain noteworthy," the Chairman said. Patil passed away at his residence 'Devghar' after a brief illness, family sources said, adding that his funeral will be held on Saturday.

Police arrested BJP leader on court's instructions on sexual harassment charges

MI News Service, Kharagpur: A court complaint was filed under case no. Under the order, the police arrested a BJP leader. The name of the arrested BJP leader is Deepsona Ghosh. Deepsona Ghosh is the former Mandal President. It is known that in 203/2025, the complainant alleged that Deepsona Ghosh had illicit relations with her daughter-in-law, due to which she had to leave the matrimonial home on October 16, 2024. On objecting, the accused Threatened the complainant and her son and sexually assaulted her 12 year old granddaughter. Kharagpur Town PS Case-no initiated on this court complaint No.557/2025 dated 10.12.2025/s329(4)/115(2)/351(3)/76(3/5) BNS and section 08 of POCSO Act. 10, SI Suvasish Mukherjee arrested the accused Deepsona Ghosh and sent her to LD court with PC prayer of 5 days. However, the court sent the accused to police custody for three days. The incident has become a topic of discussion in Kharagpur city. BJP leaders of Kharagpur city maintained silence regarding the matter. Trinamool took a jibe at BJP that now the dark deeds of BJP leaders have been exposed in front of the public.

Toto accident on National Highway in Nekurseni, Belda

MI News Service, Kharagpur: Two people were injured in a Toto accident on Kharagpur-Baleshwar National Highway-16 late Thursday night. The Toto driver is said to be in critical condition. The accident occurred in the Nekurseni area under the Belda police station. According to information received, a Toto traveling from Dantan towards Belda suddenly lost control, hit a person standing on the roadside, and overturned. The pedestrian suffered minor injuries in the accident, while the Toto driver, Vishwajeet Nayak, was admitted to Belda Super Speciality Hospital in critical condition.

Outstanding electricity bill is about two and a half lakh rupees, the day laborers of Chandrakona are in trouble

MI News Service, Kharagpur: According to sources, in the flood of 2000, Nabir's house was submerged in the river. Since then, the old BPL resident lived in a tin house next to the electricity bill of 2 lakh 83 thousand rupees! And Gholam Nabi Khan, a resident of Dhaikhand village of Chandrakona-2 block of Ghatul sub-division, is sleepless with the thought of how to pay this amount of bills. Neighbors are shocked to see this amount of electricity bill of a small day la-

MESSI 'Moshai' all set to mesmerize KOLKATA

SIDDHARTHA ALBERTT MAJUMDERR Lionel Messi magic grips the football crazy Kolkatans as the city embraces its very own Messi. Kolkata is abuzz with excitement as football fan's wait finally ends with the arrival of the Argentine superstar, Lionel Messi. The seven-time Ballon d'Or winner is now in the Kolkata, the football capital of South Asia.

As part of his visit, Messi will inaugurate the world's largest statue of himself, a towering 70-foot behemoth located adjacent to the clock tower in Sribhumi. The statue, crafted using special fibre technology, has been built by artist Monty Pal and his team of 30 artists in just a few days.

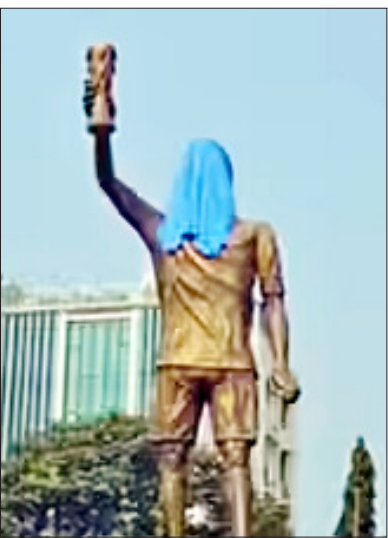

The statue's inauguration is expected to be a major event, with State Minister Sujit Basu hoping to secure a place in the Guinness Book of World Records. Messi's visit is packed with a series of events, including a sponsor's event, a football match between Mohun Bagan 'Messi' All Star and Diamond Harbour 'Messi' All Star, and a royal reception at iconic Salt Lake stadium.

The Argentine superstar is also expected to meet players from both teams, as well as dignitaries including Chief Minister Mamata Banerjee, Trinamool All India General Secretary Abhishek Banerjee, India's cricket icon Sourav Ganguly, and Tennis icon Leander Paes.

The city is all set to give Messi a hero's welcome, with fans from across the city and suburbs flocking to Salt Lake Stadium to catch a glimpse of the football legend. The event promises to be a memorable one, with Messi set to leave an indelible mark on the city and its people.

ARGENTINA Fanatics & MESSI Maniacs build 'Mini Miami' at Salt Lake

The Argentina Football Fans Club of Kolkata has transformed Aikatan, a cultural complex barely a 100 metres from Salt Lake Stadium, into a Messi

In the northern suburb of Lake Town, the Sree Bhumi Sporting Club has constructed what it claims is the world's largest statue of the Argentinian icona 70-foot iron structure depicting Messi lifting the World cup trophy. Built in just 40 days, the statue awaits a virtual inauguration by Messi himself, with organisers giving it final touches ahead of the footballer's visit.

fan zone, where blue and white prevail on everything from walls to ceiling.

At the heart of it are father and son duo Uttam and Pragnan Saha, lifelong devotees of Argentine football. Together, they have charted the country's story from Maradona to Messi, and now want Kolkata to walk through a space that mirrors the superstar's Florida home — complete with replica trophies and a giant screen looping his greatest moments.

The idea, 20-year-old Pragnan says, is simple. The exterior echoes Messi's Miami house, while the interior functions like a museum. Fans strolled past replicas of La Liga titles, Champions League cups, Copa America and World

Cup trophies, Ballon d'Ors and Golden Boots, and look up to a ceiling covered with 896 footballs — each one marking a goal from Messi's career.

At the centre stand a huge LED wall playing Messi's finest moments alongside the club's own two-decade journey. And on the main stage, they've even built a 'Messi throne'.

The Hola Messi Fanzone will be open from 10am to 10pm. The mornings (10am – 4pm) are for fan activities — debates, quizzes, and memory sessions — while the evenings (4pm – 10pm) are reserved for the main events.

Each morning brings a new theme: a fiery debate between Argentina, Brazil and Portugal supporters; a repeat showdown featuring local uncles from nearby tea shops; and then nostalgic screenings of classic matches from 2002 onwards.

KING KHAN to meet EMPEROR MESSI in Kolkata

The sources say that Shah Rukh Khan is also expected to meet Messi here in Kolkata.

Shah Rukh Khan has announced that he will meet Argentine football legend Lionel Messi in Kolkata on December 13. The visit is set to draw significant attention, as Messi prepares to participate in a series of high-profile events in the city, including the unveiling of a statue in his honour and celebrations attended by celebrities and local dignitaries.

Kolkata is all set for what is going to be one of the city's largest receptions, with Messi's arrival drawing widespread excitement. Fans from across the region are flocking to the city, eager to catch a glimpse of the football icon and witness the festivities. Shah Rukh Khan confirmed the meeting on X, saying, "This time round not planning my Knight in Kolkata. and hoping the day Ride is completely 'Messi'."

ISKCON Demands Inclusion of the Bhagavad Gita in State School Curriculum

Suman Ganguly

The International Society for Krishna Consciousness (ISKCON) has demanded that the Bhagavad Gita be introduced in the school curriculum of West Bengal. The organisation wants the scripture to be included from Class V to Class XII.

Earlier, BHARATIYA SANSKRITI PARISHAD had organised the massive "five-lakh-voice Gita chanting" event at the Brigade Parade Ground. The event triggered controversy after chicken patties were reportedly sold at the venue. With the 2026 Assembly elections approaching, opposition parties—including the Trinamool Congress—allege that the chanting programme is a political move by saffron forces. Amid this political backdrop, ISKCON is now pushing for Gita lessons in schools.

For nearly 29 years, ISKCON Mayapur has been observing Gita Jayanti with great fervour. The organisation also conducts structured courses on the Bhagavad Gita every year through the "Bhaktiviedanta Gita Academy," both online and offline. ISKCON's Mayapur

headquarters maintains that Gita education should not remain confined to its campus but should be made compulsory in schools across the state.

Speaking on behalf of ISKCON, Public Relations Officer Rasik Gauranga Das said, "In today's time, every individual—especially students—should study the Gita. Hence, we urge the government to include the Gita in the curriculum." ISKCON has already prepared a detailed syllabus from Class V to Class XII and wants it implemented in all schools. According to him, the global interest in Gita studies is rising, with increasing participation from the Gen-Z generation at ISKCON's Gita classes each year.

However, a section of observers questions whether it is appropriate to mandate Gita lessons in a secular country like India. In response, Rasik Gauranga Das argues, "Madrasas teach the Quran; Islamic studies are permitted. So why should Gita teaching be an issue? If needed, let it be compulsory at least for Hindu students."

borer.According to sources, in the flood of 2000, Nabir's house was submerged in the river. Since then, the old man

lived in a tin shed next door. Due to the flood situation in the area again, the electricity department opened the BPL registered meter and took it away. Since then he lived with his daughter Jamila Bibi. Recently, he has become worried after seeing this amount of outstanding electricity bill. Nabi said that although he informed the electricity department about the unusual electricity bill, there was no solution. The old man also said that even though he reported this amount of

electricity bills to the office many times before, it was of no avail.Regarding the electricity bill, the department said that the person has not paid any electricity bill since 2010. This amount with interest currently stands due. Even if all the complaints are not true, the department has assured to take necessary measures after looking into the whole matter. They said that they will apply to the electricity department so that the old man's dues are waived off.

CII Calls for Urgent, Scalable ESG Implementation Across Industries to Meet Global Climate Goals

MI News Service, Kolkata: CII has called on industries to urgently implement large-scale Environmental, Social and Governance (ESG) practices to keep pace with global climate commitments and strengthen long-term resilience and competitiveness.

Speaking at the Green Industry Conclave organised by CII Eastern Region in Kolkata today, Ms Apurba Mitra, Co-Chairman, CII Eastern Region ESG Subcommittee and Partner – KPMG, Lead – Climate Change, noted that majority of the emissions across the world today are covered by updated Nationally Determined Contributions (NDCs) under the Paris Agreement — a significant demonstration of global climate engagement, though overall ambition remains below what is needed to keep warming to 1.5°C. She said this reflects a decisive shift toward strengthening climate action but stressed that current collective commitments would deliver far less than the emissions reductions required by 2035.

Mitra underscored that achieving meaningful emissions reduction by 2035 will require rapid innovation, widespread ESG integration, and transforming compliance obligations into opportunities that deliver real impact. She emphasised that building strong ecosystems anchored in enabling policies, innovation, and close collabora-

Salt Lake Stadium (Vivekananda Yuba Bharati Krirangan) in Kolkata will host the opening of Lionel Messi's GOAT India Tour on Saturday. The event will feature a meet-and-greet, the inauguration of a virtual statue, a celebrity football match (GOAT Cup) with stars such as Shah Rukh Khan and Sourav Ganguly, a football clinic, and a cultural programme, celebrating the global football icon's first visit in years. Preparations for the event were underway at the stadium on Friday.

Conviction Secured in POCSO Case; Accused Sentenced for 20 Years

MI News Service, Ranaghat: A special POCSO court in Ranaghat has convicted Goutam Rajaraj (55) for raping a 12-year-old girl during Durga Puja in 2021. The court on Thursday sentenced him to 20 years of rigorous imprisonment, terming the crime "heinous and deeply disturbing."

The incident occurred on October 13, 2021, when the minor, visiting a relative's home in Arabandi for the festivities, was lured away by the accused. Following the complaint lodged at Santipur Police Station, police arrested Rajaraj and submitted the chargesheet after investigation.

The court also imposed a monetary fine on the convict and directed compensation for the survivor under the Victim Compensation Scheme. Officials of Ranaghat Police District welcomed the verdict, saying it reflects the administration's "zero tolerance" towards crimes against children.

Police SI Abhik Mukherjee, IO-2, Kaushik Kar and PP Rajashree Behura played a vital role in the case under section 6 of the POCSO Act 2012.

Asha Pillai, Group Planner IT, Shell India, Biswanath Chattopadhyay, CEO, IVL Dhunseri Petrochem Industries, Apurba Mitra, Co-Chairman, CII Eastern Region ESG Subcommittee and Partner – KPMG, Lead – Climate Change, Arijit Basu, Managing Director, Veedol Corporation Limited, and Gargi Mitra, Deputy Director, CII Eastern Region

oration between government and industry will be crucial for ensuring inclusive and timely progress aligned to science.

During the conclave two whitepapers has been released: "Comparative Analysis of Indian and Global; ESG Rating Mechanisms-Regulatory Evolution, Methodological Divergence and Future Pathways for Alignment" and "ESG Compliance Framework: Regulatory, Stakeholder & Market Evolution in India". These publications reflect CII's continued effort to support organisations of all sizes in navigating the evolving ESG landscape and strengthening their preparedness.

Addressing the gathering, Arijit Basu, Managing Director,

Veedol Corporation Limited, remarked that climate change has fundamentally reshaped industrial realities and that ESG has emerged as a key driver of long-term sustainability. He stated that ESG must be treated as an integral organisational asset, capable of delivering value when designed to solve real-world challenges while enhancing both sustainability and profitability. Mr Basu cautioned that industries that fail to embed ESG into their core operations risk undermining their long-term viability and the security of their workforce.

Biswanath Chattopadhyay, CEO, IVL Dhunseri Petrochem Industries, provided insights on translating sustainability into

everyday practice. He demonstrated how widely used products can be redesigned to reduce environmental impact and highlighted that although the consumption of daily-use plastic products may not decline significantly in the short term, industries must prioritise making these products more sustainable and promoting responsible consumption as an essential foundation for decarbonisation.

CII reiterated that immediate, comprehensive and industry-wide ESG implementation is vital for India to align with global climate trajectories, strengthen supply-chain resilience, and maintain competitiveness in an increasingly sustainability-driven global economy.

"Don't Go Near BSF Posts" Mata warns amid SIR Row

From PG 1
to divide people," she alleged. Banerjee referred to the mass Bhagavat Gita recital organised in Kolkata on Sunday. "We all recite the Gita at home whenever we need to. Why organise a public meeting? Gods stay in the heart. Those who pray to Allah do so in their hearts. During Ramzan and during Durga Pujo, we pray together. Those who are shouting about the Gita, I want to ask them what Lord Krishna said. Dharma means purity, humanity, peace, and not violence, discrimination, and division," she said. She said great personalities such as Ramkrishna Paramhansa, Swami Vivekananda, Rabindranath Tagore and Netaji Subhas Chandra Bose have not divided people. "Then who are you?" she asked. She said an injured tiger is more ferocious than a healthy one. "If you attack us, we know how to retaliate. We know how to stop injustice". She said her government won't let anyone oust people from Bengal. "I have only one request. Do not go anywhere near BSF posts in border areas."

Messi's India Tour set to dazzle, but without his 2011 football magic

From PG 1
to meet him after the Dharamshala T-20 match on December 14.
Messi's last appearance in India remains etched in memory when on September 3, 2011, he danced past defenders, mesmerised with his left-footed grace and triggered waves of ecstasy in a packed stadium. Though he didn't score, fans left believing they had witnessed greatness. The highlight of the tour will be a 45-minute philanthropic fashion event in Mumbai on Sunday, featuring Messi, his long-time strike partner Luis Suarez and Argentina midfielder Rodrigo De Paul. "There will be celebrity models, cricketers, Bollywood celebrities, millionaires, founders. Tiger and Jackie Shroff, John Abraham among others," said Satadru Dutta, sole promoter of the tour. Suarez will also feature in a Spanish music show. The organisers have requested Messi to bring "some memorabilia" of his trophy-winning 2022 World Cup campaign which will be auctioned during the Mumbai leg. The Mumbai event at Wankhede Stadium will be preceded by a Padel Cup at the CCI. But on his arrival in Kolkata on the first leg of his four city trip, the city is simply agog with excitement to welcome Messi on Friday night before his formal appearance on Saturday. He will stay at a five-star hotel on EM Bypass and attend a sponsor-exclusive meet-and-greet in the morning. Kolkata will also have a new 'Messi landmark' near the Sreebhumi Clock Tower (the Big Ben replica) on the VIP Road with a giant 70-foot statue of the Argentine World Cup winner holding aloft the Trophy. The unveiling of it will be a virtual ceremony from his hotel room after police denied permission for a public event. A 25ft x 20ft Messi mural, planned for next year's Durga Puja season, will also be unveiled and later presented to Messi at the Salt Lake Stadium.
After the event, Messi will fly to Hyderabad in the afternoon. The Hyderabad leg was added to his itinerary after Messi's proposed friendly in Kochi was cancelled. Once there, he will attend the GOAT Cup — a festival backed by Telangana Chief Minister Revanth Reddy — featuring a 7v7 celebrity match, penalty shootouts, a masterclass for young talents and a musical tribute. Messi will conclude his tour in Delhi, where he will meet Prime Minister

A major fire broke out in the wee hours, reducing the entire Ramgarh Market in South Kolkata to ashes. Seven fire engines worked for almost two hours to bring the blaze under control, on Friday.

Devastating Fire Guts 40 Shops in Baghajatin's Ramgarh Market

MI News Service, Kolkata: Another major fire has struck Kolkata, this time reducing the bustling Ramgarh Market in Baghajatin to ashes. At least 40 shops were completely gutted in the devastating blaze. Although the fire has largely been brought under control, several pockets of flames are still being extinguished by firefighters. The exact cause of the fire is yet to be confirmed, but initial investigations suggest that a short circuit in one of the tailoring shops may have triggered the incident. Overnight, traders suffered losses amounting to several lakhs of rupees, leaving them deeply distressed. The fire broke out around 1:30 am on the early hours of Friday. Within min-

utes, flames engulfed large sections of the Ramgarh Market. Locals first spotted the blaze and immediately alerted the fire department. Multiple fire tenders rushed to the spot and began fire-fighting operations. However, due to the tightly packed structure of the market, firefighters struggled to bring the flames under control. It was only in the early hours of Friday that the main fire was contained, though residual pockets of flames remained. Fire officials reiterated their preliminary assessment that a short circuit was the most likely cause.
Upon receiving news of the incident, local councillor Bappaditya Dasgupta and MLA Debabrata Majumdar

reached the site late at night. They also communicated with Mayor Firhad Hakim regarding the scale of the damage. The councillor said the 40-year-old market comprises 40-50 shops, none of which were insured. As a result, he stated that he would appeal to the government for assistance in both rebuilding the market and supporting the affected traders. The MLA also assured that all possible steps would be taken to help the victims recover from the losses. The market, built on 57 kathas of government land, has been home to numerous traders for decades. Now, with their shops reduced to rubble overnight, many are facing severe financial hardship.

Kolkata Hosts Screening and Live Concert of Bengali Kirtan Documentary

MI News Service, Kolkata: A special screening and live concert of the documentary "Kirtan: The Heritage of Bengal" was held at the Birla Academy of Art and Culture Auditorium in Kolkata. Directed by Debolina Ghosh, the film recently premiered at the Festival Terres du Bengale in Paris, where both the documentary and Ghosh's kirtan performance received international appreciation. The first private screening in Kolkata took place on Wednesday evening. After the screening, Debolina Ghosh performed a live kirtan recital, followed by an interactive discussion in which the audience engaged with her on the research, filmmaking process, and contemporary relevance of the kirtan tradition. The documentary is the result of eight years of research and traces the journey of Bengali kirtan from the 15th-century Bhakti movement to modern-day practice. Featuring insights from scholars, archival material and cultural-historical analysis, the film presents a renewed understanding of the evolution and significance of kirtan. The narration by veteran actor Barun Chanda adds depth to the storytelling. The event was attended by prominent artists, researchers, cultural figures and institutional representatives. Jointly produced by Debu's Darbar and the Bhaktivedanta Research Centre, the project aims to introduce Bengal's kirtan heritage to younger generations.

Governor Flags BLO Safety, Proposes Three-Point Plan to State

MI News Service, Kolkata: Governor C.V. Ananda Bose has placed a three-point proposal before the state government to ensure the security of Booth Level Officers (BLOs). The move comes shortly after the Supreme Court directed the Election Commission to take concrete steps regarding BLO safety, observing that the Centre also bears responsibility in this matter. Now, raising the same concern, the Governor has voiced his worry over the conditions under which BLOs are working. On Friday, a statement issued by the Raj Bhavan outlined the Governor's proposals aimed at strengthening the security framework for BLOs across West Bengal. According to the statement, the Governor suggested three primary measures: The Governor noted that since BLOs work across all tiers—from rural to urban areas—performing booth-based duties, district administrations must create robust security arrangements at each booth to ensure their protection. The

Governor stated that during the distribution and verification of enumeration forms, the state police should have deployed adequate police personnel at every booth to safeguard the interests of BLOs and prevent any form of intimidation or obstruction. Highlighting the demanding nature of BLO duties, which often extend late into the night, the Governor emphasised that the state government must take responsibility for providing all necessary facilities and support to officers on the ground.
During the last hearing on the SIR process, Justice Surya Kant remarked that if BLOs feel unsafe or face any form of insecurity, they are entitled to lodge complaints with the Chief Electoral Officer and the District Electoral Officer. The Bench stressed that the Election Commission must act decisively to ensure their security; otherwise, lawlessness may follow. Moreover, on December 4, the Supreme Court issued several directives to states regarding BLO protection.

Circus at Park Circus Maidan Faces PIL Over Pollution Concerns

MI News Service, Kolkata: After more than a decade, a grand circus show is set to return to Park Circus Maidan. Recently, the Kolkata Municipal Corporation (KMC) granted permission for organising the event at the iconic ground. However, the approval has now sparked a legal battle, with a public interest litigation (PIL) filed before the Calcutta High Court opposing the decision on the grounds of environmental pollution. The matter came up on Friday before the Division Bench of Acting Chief Justice Suvra Ghosh Pal. On December 1, KMC gave the green signal for hosting the circus on one side of Park Circus Maidan. The last circus at

this venue was held in December 2014. Thereafter, permission was withheld due to the construction and extension work of the Maa and AJC Bose flyover network. With the completion of the project, the circus finally returns after ten long years—but not without controversy, as the issue has now reached the High Court. The petitioner argued that years ago, plans to shift the Kolkata Book Fair from its previous venue to Park Circus Maidan were abandoned after a case was filed in the High Court citing pollution. In the 2008 ruling, the court accepted the pollution-related arguments and directed that the fair be moved.

Rs 45 cr drugs, gold and diamonds seized at Mumbai airport; 12 held

From PG 1
hidden inside trolley bags bearing baggage tags of another flight, while in others, the narcotics were concealed inside lumps of tamarind, he said. All these passengers, who had arrived from Bangkok on various flights, were arrested under provisions of the Narcotic Drugs and Psychotropic Substances (NDPS) Act, the official said. In another operation, Cus-

toms sleuths recovered 6 kg of suspected hydroponic weed valued at Rs 6 crore from three passengers, who had also arrived from Bangkok, and arrested them, he said. The Customs also seized gold valued at Rs 1.51 crore from four passengers and diamonds of Rs 87.75 lakh from another person and registered cases on charges of smuggling, the official added.

IndiGo board appoints external aviation expert for probing service disruption

From PG 1
assessing manpower planning, fluctuating rostering systems, and the airline's preparedness to implement the latest duty period and rest norms for pilots, which came into effect from November 1 this year. In a related development, the DGCA on Friday sacked four Flight Operations Inspectors (FOIs) over operational disruptions at the Gurugram-headquartered airlines. "Chief Aviation Advisors LLC, led by Captain John Illson, veteran aviation expert, to conduct an independent expert review and assessment of the recent operational disruption and the contributing factors," the airline said. IndiGo Chairman Vikram Singh Mehta had in a video message earlier this week said that the board had decided to involve external technical experts to work with the management and help determine the root causes that led to the disruptions. "The objective is to conduct an independent root cause analysis of the recent operational disruption, besides opportunities for improvement," it said. This decision follows the recommendation of the Crisis Management Group, IndiGo said. As part of its assessment, the CMG advised commissioning an independent expert review in the matter, the airline said, adding with the board's approval now in place, the review will begin at the earliest. The independent expert reviewer will submit a comprehensive report to the board upon completion, it stated. The Rahul Bhatia-controlled airline cancelled thousands of flights between December 1 and December 9 on account of lack of proper planning, and crew shortage in implementing the new set of regulations for pilots' duty period and rest, which were put in place from November 1.
"The four FOIs, under various categories, on a contract basis, are hereby relieved from the DGCA with immediate effect to join their respective parent organisation," a DGCA order said on Friday. FOIs are senior officials within the Directorate General of Civil Aviation, working as part of its regulatory and safety oversight functions, often deployed to monitor airline operations. These officials, who come on deputation from various air operators, ensure aviation safety by inspecting, auditing, and certifying airlines and personnel, such as pilots, dispatchers, and cabin crew, to meet strict regulatory standards, verifying various regulations and overseeing training, flight standards, and accident prevention measures in India.

A press conference for the 74th Dover Lane Music Conference takes place at the Bengal Club, in Kolkata on Friday.

Dover Lane Music Conference is set to mesmerize classical music lovers

MI News Service, Kolkata : Ending the year-long wait for this grand annual event for the city's thousands of classical music lovers, the 74th year of the famous 'Dover Lane Music Conference' will be held here for four days from January 22 to 25, 2026 to mesmerize the prime audience. Announcing the schedule of this grand event at a news conference here on Friday, noted industrialist and a great classical music lover Sanjay Budhia, in presence of General Secretary of the music conference Manotosh Mukherjee and several leading performers and artists said, like every year, this time too the Pre-Platinum Jubilee session of the Dover Lane Music Conference is being organised at its fixed dates from January 22 to 25, 2026. Like every year this year's music conference has also generated huge enthusiasm among the city's large classical music and dance

lovers to witness and listen to India's best of talents of different Indian classical music in this festive season, said Budhia welcoming the guests. Reiterating that like on every previous occasion, this time too there will be a very attractive mix of well established and reputed artistes, who will perform alongside several budding but very talented vocalists, sitarists, violinists and classical dancers during all four days of the nightlong programmes from 8 P.M. to 6 A.M. amid a festive atmosphere.. Also speaking on the occasion Manotosh Mukherjee said this year the 'Dover Lane SangeetSanman' would be given to renowned vocalist Ajay Pohankar. Claiming that they had received overwhelming response from participants across the country including from Jammu and Kashmir, for their annual talent hunt programme with over 650 contestants already

enlisting their names this year. To a query he said altogether 52 classical music performers will participate in this year's music conference in different areas of Indian classical music including former Bollywood star and well known Bharat Natyam dancer Menakshi Sheshadri. Among other artists who would perform for four days next month are - Ruchira Kedar (Vocal), Saugata Roy Chowdhury (Sarod), Ajay Pohankar (Vocal), Meera Santosh Iyer (Bharat Natyam), Smiti Mishra (Vocal), Rupshree Bhattacharjee (Harmonium), Purbayan Chatterjee (Sitar), Nirmalya Dey (Dhrupad), A Lalitha and A Nandini (Duet Violin), Sulagna Bhattacharjee (Odissi), Sarwar Hossain (Sarangi), Siraj Ali Khan (Sarod), Ghulam Abbas Khan (Vocal), Subhen Chatterjee (Tabla) and Budhaditya Mukherjee (Sitar) among others .

Cal HC Orders Interviews for 2016 SSC Waiting List Candidates

MI News Service, Kolkata: The Calcutta High Court has directed the School Service Commission (SSC) to conduct interviews for candidates on the waiting list of the 2016 SSC recruitment, who were previously denied the opportunity due to exceeding the age limit. Justice Amrita Sinha issued the order specifically for the litigant candidates, instructing the SSC to hold their interviews and submit the interview scores in sealed envelopes to the court.

The SSC has been asked to inform the High Court whether the interview process will be video-graphed. During Friday's hearing, the lawyers representing the petitioners stated that the candidates had submitted their application forms, appeared for the examinations, and completed document verification. However, they were later informed that they would not be called for interviews because of age constraints. According to their counsel, the Supreme Court's guidelines provide for age relaxation for eligible candidates, but this provision was not being implemented in this case, prompting the filing of the petition. In April of last year, the Supreme Court had annulled the entire 2016 SSC recruitment panel, leaving nearly 26,000 teachers and edu-

cation staff without jobs. Following the apex court's directions, a new recruitment process was initiated. In this context, the Kolkata High Court's fresh instructions to interview candidates on the 2016 waiting list are considered highly significant. The SSC has not commented on the High Court's order, stating only that it will review the court's directives. Meanwhile, Chinmoy Mondal, representing the unemployed eligible teachers, welcomed the ruling, saying, "We appreciate the court's decision to allow interviews for candidates on the waiting list. However, it should also ensure that no qualified candidate suffers any disadvantage."
Earlier, the court had directed the SSC to provide a complete list of candidates, including personal details, to avoid any discrepancies. Following the Supreme Court's instructions, the SSC published the list the very next day, including the subjects applied for, parent's names, and dates of birth, thereby ensuring transparency in the recruitment process. The High Court order is seen as a critical step toward rectifying the long-standing issues in the 2016 recruitment, potentially offering relief to thousands of qualified candidates who have been awaiting justice for years.

Vidyasagar Setu to Remain Shut for 8 Hrs on Sunday for Repairs

MI News Service, Kolkata: Maintenance and several technical repair works are currently underway on Vidyasagar Setu, also known as the Second Hooghly Bridge. As the tasks are time-consuming and require uninterrupted operational space, authorities have scheduled periodic closures of the bridge, primarily on weekends, to minimise public inconvenience. This weekend too, the bridge will remain closed for eight hours on Sunday to facilitate ongoing repair work. In a notification issued on Thursday, Kolkata Traffic Police announced that on Sunday, 14 December, from 6:00 am to 2:00 pm, vehicular movement on Vidyasagar Setu will be completely suspended. The advisory also laid out alternative routes for com-

muters to ensure smooth traffic flow during the closure.

According to the notification titled "Traffic Notification in connection with the full closure of Vidyasagar Setu, Kolkata from 06:00 a.m. to 02:00 p.m. on 14/12/2025 (Sunday)", the shutdown is essential to allow uninterrupted maintenance activity under the supervision of the Hooghly River Bridge Commission-

ers (HRBC). Although routine maintenance began on the bridge as far back as 1992, the major components—particularly the suspension cables and beams—had not been replaced in decades. To ensure structural health and long-term safety, HRBC has now undertaken the task of replacing 19 of the 152 suspension cables. Sources indicate that each cable requires nearly a month to be replaced. The target for completion of this extensive work has been set for 31 May 2026. Vidyasagar Setu is one of the most crucial links between Kolkata and Howrah, carrying a massive volume of daily commuter traffic. On weekdays, the bridge is one of the fastest routes between the two cities, especially during peak hours from Mon-

day to Friday. This is why authorities have chosen weekends—particularly Saturdays and Sundays—to conduct the essential repair work, minimising disruptions for office-goers and daily commuters. As part of the planned maintenance schedule, the bridge remains partially or fully closed for a few hours on several weekends. The upcoming Sunday closure is part of this phased programme. Kolkata Traffic Police have urged motorists to use the recommended alternative routes and follow traffic advisories to avoid congestion. With major structural upgrades underway, officials say the temporary inconvenience is a necessary step for ensuring the long-term safety and durability of the iconic bridge.

SEBI launches single window access for low risk foreign investors

MI News Service, New Delhi: Markets regulator Sebi has introduced a new framework to make it easier for low risk foreign investors to participate in the Indian securities market. The move, aimed at simplifying compliance and enhancing the country's attractiveness as an investment destination, comes through the Single Window Automatic and Generalised Access for Trusted Foreign Investors (SWAGAT-FI).

The SWAGAT-FI framework will provide easier investment access to low risk foreign investors, enable a unified registration process across multiple investment routes, and reduce repeated compliance and documentation requirements for such entities. Sebi has identified low risk foreign investors to include government-owned funds, central banks, sovereign wealth funds, multilateral entities, highly regulated public retail funds, and appropriately regulated insurance companies, as well as pension funds.

Sebi introduced the SWAGAT-FI framework for both Foreign Portfolio Investors and Foreign Venture Capital Investors

through two separate notifications dated 1 December. The regulator has amended FPIs and FVCIs regulations, which will come into force on 1 June, 2026. The amendments follow the Sebi board's approval of the proposal in September. Under the new framework, SWAGAT-FIs applying for registration or already registered as FPIs have the option to also register as FVCIs without the need for additional documentation.

Registration under both FPI and FVCI regulations will enable SWAGAT-FIs to invest in listed equity instruments and debt securities of Indian companies as FPIs, and in unlisted Indian companies engaged in specified sectors and start-ups as FVCIs under respective regulations. To enhance ease of compliance, Sebi has increased the periodicity for continuance of registration, including payment of fees

and review of KYC documentation, to 10 years, up from the current three-year or five-year periods.

For FPIs operating from International Financial Services Centres, Sebi has allowed retail schemes with a resident Indian sponsor or manager to register as FPIs. Currently, only Alternative Investment Funds in IFSCs with a resident Indian sponsor or manager are permitted to register as FPIs. Sebi also noted that limits on sponsor contribution by resident Indian non-individuals in funds set up in IFSC, as specified by Sebi and International Financial Services Centres Authority, were at variance, creating a risk of non-compliance. The regulator amended FPI Regulations to cap such sponsor contributions at a maximum of 10 per cent of the corpus of the fund or assets under management in the case of retail schemes.

As of June 30, 2025, India had 11,913 registered FPIs holding assets worth Rs 80.83 lakh crore. Sebi estimates that SWAGAT-FIs will contribute more than 70 per cent of the total assets under custody of all FPIs.

Modernisation Of Railway Stations under Amrit Bharat Scheme In West Bengal

MI News Service, Kolkata, 12 Dec.25 : The Minister for Railways, Information & Broadcasting and Electronics & Informationtechnology, Shri Ashwini Vaishnaw today stated in the Rajya Sabha that the Ministryof Railways has launched Amrit Bharat Station Scheme for redevelopment of stationswith a long-term approach.

In a written reply to the question raised by MP Shri Samik Bhattacharya in the RajyaSabha today on the current status of progress of each of the 101 railway stations inWest Bengal selected under the Amrit Bharat Station Scheme, including percentageof work completed, names of the seven stations in West Bengal where development network under the scheme has not yet commenced, along with the reasons for the samethe expected timeline for completion of works at the remaining stations, along withthetargets set by the Ministry for the Financial Year 2025-26 and the key infrastructureupgrades and passenger amenities being provided under the scheme at thesestations, particularly concerning safety, accessibility and inter-modal integration, theMinister said, the scheme involves preparation of master plans and theirimplementation in phases to improve the sta-

tions. The master planning includes:

- Improvement of access to station and circulating areas
 - Integration of station with both sides of city
 - Improvement of station building
 - Improvement of waiting halls, toilets, sitting arrangement, water booths
 - Provision of wider foot over bridge/air concourse commensurate withpassenger traffic
 - Provision of lift/escalators/ramp
 - Improvement /Provision of platform surface and cover over platforms
 - Provision of kiosks for local products through schemes like ‘One Station OneProduct’
 - Parking areas, multi-modal integration
 - Amenities for Divyang-jans
 - Better passenger information systems
 - Provision of executive lounges, nominated spaces for business meetings,landscaping, etc. keeping in view the necessity at each station.
- The scheme also envisages sustainable and environment friendly solutions, provisionof ballast-less tracks etc. as per necessity, phasing and feasibility and creation of acity centre at the station in the long term, added the Union Minister.

BIDHANNAGAR FAIR sees return of Bangladesh stalls

MI News Service, Kolkata: Bidhannagar Mela (Utsav) has begun. The township's favourite fair is on at Central Park from 2pm to 10pm, till December 21. The fair, that is organised by Bidhannagar Municipal Corporation, was inaugurated on December 1. The date also happened to be the joint birthday of Sujit Bose, MLA and minister, and Sabyasachi Dutta, chairman of the Corporation. So during the inauguration ceremony, mayor Krishna Chakraborty called for a three-tier cake that was cut by the duo. The two, known to be political adversaries, happily fed each other slices. Also in attendance were ministers Shashi Panja, Bratya Basu, Chandrima Bhattacharya, a host of councillors and other dignitaries. "From the day after this fair ends residents start enquiring when it will begin the next year. Such is its popularity," said the mayor.

change of Religion
I,Motu Bain, daughter of Tarapada Bain,by faith Hindu,residing at Parui Para,Uttar Kalsur,Deganga, North24 Parganas - 743438,West Bengal, have changed my religion Hindu to Islam vide an affidavit No 83723 sworn before the Notary Public at North24Parganas on 05/12/2025. Now My Religion is Islam.

Kolkata hosts dialogue on UK-INDIA trade opportunities

MI News Service, Kolkata: The Federation of Indian Export Promotion Organisations (FIEO) convened a high-level interaction in Kolkata recently to explore emerging trade opportunities between the United Kingdom (UK) and India under CETA, organised as part of the Niryat Bandhu initiative aimed at mentoring new and aspiring exporters.

The session featured His Majesty's Trade Commissioner for South Asia, Harjinder Kang, formerly the UK's Chief Negotiator for the UK-India Free Trade Agreement. Speaking at the event, Kang said, "The trade relations between India and the UK are extremely positive right now. India is doing very well with all its relations and that is showing. On the business side, our trade has already gone up because of the confidence in the trade deal. And I think it'll only get stronger."

He was joined by Dr. Andrew Fleming, Deputy High Commissioner, Kolkata, along with senior members of the UK Trade Policy Team. Reflecting on the progress of bilateral negotiations, Dr. Fleming noted, "After months of negotiation, the trade agreement has been signed. It's a turning point for businesses on both sides. The UK already imports so much, but we estimate an increase of £9.9 billion. What truly distinguishes the UK is that customers are conscious about where their products come from.

Khurda Road Division Accelerates Solar Energy Expansion to Achieve Long-Term Energy Security

MI News Service, Kolkata, 12 Dec.25 : In line with Indian Railways' mission to promote clean and renewable energy, Khurda Road Division of East Coast Railway (ECOR) is making significant strides in rooftop solar power generation across its service buildings and Railway infrastructure. **Major Progress in Solar Capacity Installation** : Khurda Road Division has been consistently expanding its solar power capacity with a long-term target of 14,408 kWp. The progress so far is as follows: Up to 2023-24: 1,826.06 kWp. Up to 2024-25: 2,186.21 kWp. Up to 2025-26: 7,247.79 kWp (planned). In pipeline as on date: 3,148 kWp. This expansion is aimed at equipping various service buildings with rooftop solar panels to generate clean electricity and reduce dependency on conventional sources. Application Submitted for Net Zero Certification. ECOR has applied to the Bureau of Energy Efficiency (BEE) under the "BEE Shunya Labelling Programme" for Net Zero Certification. Key installations proposed under this initiative include: Officers' Club at Rail Kunj, including Banquet Hall, Yoga Hall and Badminton Hall - 160 kWp, TRIP Shed, Bhubaneswar - 100 kWp, MEMU Shed, Khurda Road - 1000 kWp. **Commitment to Renewable Energy and Carbon Reduction**: Khurda Road Division of East Coast Railway is committed to promoting solar energy to ensure long-term energy and ecological security while significantly reducing carbon emissions. Rooftop solar plants are being installed across office buildings, workshops, hospitals and railway stations. In addition, ECOR is planning Solar PV installations to further augment renewable energy generation for meeting traction load requirements to the maximum possible extent. Once the upcoming solar plants are commissioned, East Coast Railway will have a total installed solar capacity of 14.4 MWp, which is expected to reduce carbon emissions by 13410 tonnes per annum. This initiative forms an integral part of East Coast Railway's ongoing efforts to adopt renewable energy and promote environmentally responsible operations across Khurda Road Division.

Outstanding Performance By BRL Unit, Sealdah Division

● Critical Bridge Components Replaced Within Sanctioned Block — A Benchmark in Precision & Efficiency

MI News Service, Kolkata, 12 Dec.25 : Ensuring uninterrupted and smooth train operations, the Bridge Line (BRL) Unit of Sealdah Division delivered a remarkable display of technical excellence, meticulous planning, and flawless execution by completing a major infrastructure replacement task during the night (00.00 hrs to 03.30 hrs) of 11/12 December 2025. The team carried out extensive bridge component renewal work on Bridge No. 1 (Line No. 5) and the Common Passenger Line (Sealdah-Bidhannagar Road)—all without exceeding even a single minute of the sanctioned traffic block.

The key achievements included the replacement of 3 cross girders and 6 stringers within the sanctioned block, with zero block overrun, reflecting exceptional coordination and discipline. The activities involved complete dismantling of the track, removal of nearly 200 bolts and nuts from existing cross-girders and stringers, extraction of 3 damaged cross girders and 6 damaged stringers, and installation of 3 new cross girders and 6 new stringers, followed by full reassembly of sleepers, pads, rails, and fittings. The bridge spans measured 1×10.3 m + 1×26.4 m + 1×13.4 m (Open Line), with a total of 26 cross girders and 46 severely damaged stringers replaced. The per-

formance highlights included achieving the target ahead of schedule, executing the work with precision engineering and seamless teamwork, and ensuring significant enhancements in the safety, durability, and structural reliability of the bridge.

This exceptional effort by the BRL Unit stands as a testament to Sealdah Division's unwavering commitment to maintaining safe, modern, and robust railway infrastructure, even under demanding overnight working conditions.

Bhanupalli–Bilaspur–Beri (63 km) New Rail Line Sanctioned at 6,753 Crore

- **Bilaspur–Manali-Leh Strategic Rail Line: 489 km Route with 270 km of Tunnels Planned at an Estimated 1.31 Lakh Crore**
- **Rail Budget for Himachal Pradesh Jumps Over 25 Times, From 108 Crore Per Annum in 2009-14 Period to 2,716 Crore in 2025-26**
- **Rail Connectivity Enhanced with Commissioning of Nangal Dam-Daulatpur Chowk Section; Work Progresses on Daulatpur Chowk-Talwara and Chandigarh-Baddi Lines; DPR Prepared for Baddi-Ghanauli New Line**

MI News Service, New Delhi, 12 Dec.25 : Bhanupalli-Bilaspur-Beri (63km) New Rail Line project has been sanctioned on cost sharing basis having 25% share of State Government of Himachal Pradesh and 75 % share of Central Government. Further, full cost of land beyond Rs. 70 crore is to be borne by Government of Himachal Pradesh. Detailed Estimate of the project was sanctioned at a cost of Rs. 6753 crore including land cost of Rs. 1617 crore.

In Himachal Pradesh, 124 Ha of land is required for the execution of the project. Against this requirement, only 82 Ha have been provided by State Government of Himachal Pradesh. Work has been taken up on the available land. Land beyond Bilaspur to Beri is yet to be handed over by Government of Himachal Pradesh. Non-availability of land is adversely affecting the project.

The total expenditure incurred on the project so far is Rs.5,252 crore. As per cost sharing arrangements Rs. 2,711 crore was to be given by Government of Himachal Pradesh. However, they have deposited only Rs. 847 crore

as their share of cost. Thus, Rs.1,863 crore is balance with State Government of Himachal Pradesh. Non deposition of their share of cost is adversely affecting the progress of project.

The progress of this project is affected due to non fulfillment of their commitments by State Govt. The support of State Govt is required to expedite the Project.

The Government of India is geared up to execute projects, however success depends upon the support of Government of Himachal Pradesh.

Himachal Pradesh Budget allocation for Infrastructure projects and safety works, falling fully/ partly in the state of Himachal Pradesh is as under:
Period Outlay 2009-14 108 crore/year 2025-26 2716 Cr. (More than 25 times)

To improve connectivity in Himachal Pradesh, Nangal Dam - Una - Andaura - Daulatpur Chowk (60 km) section of Nangal Dam - Talwara - Mukerian new line project has been commissioned. Work of Daulatpur Chowk - Kartoli Punjab - Talwara (52 km) section has been taken up. Further, work of Chandigarh-Baddi New Line (28 Km) have also been taken up at a cost of Rs. 1540 crore.

Moreover, to improve rail connectivity in Himachal Pradesh, Survey for Baddi-Ghanauli new line (25 Km) has been completed and Detailed Project Report (DPR) has been prepared.

Bilaspur – Manali – Leh new line is identified as strategic line by Ministry of Defence. The survey has been completed and Detailed Project Report has been prepared. The project passes through difficult terrain of Himalayas,

which are full of geological surprises and numerous problems. The total length of the project is 489 Km including tunnels of 270 km length. Anticipated cost of the project as per Detailed Project Report is 1,31,000 crore.

Sanction of any railway project depend upon many parameters/factors which include the following:

- Anticipated traffic projections and Remunerativeness of the proposed route
- First and last mile connectivity provided by the project
- Connection of missing links and providing additional route
- Augmentation of congested/saturated lines
- Demands raised by State Governments/Central Ministries/Public representatives,
- Railway's own operational requirements
- Socio-economic considerations
- Overall availability of funds

Completion of Railway project/s depends on various factors which include the following:

- Land acquisition by State Government
- Forest clearance
- Shifting of infringing utilities
- Statutory clearances from various authorities
- Geological and topographical conditions of area
- Law and order situation in the area of project site
- Number of working months in a year for particular project site etc.

All these factors affect the completion time and cost of the project/s. This information was provided by the Union Minister for Railways, Information & Broadcasting and Electronics & Information Technology, Shri Ashwini Vaishnaw, in a reply to a question in Rajya Sabha.

Regulation Of Trains For Maintenance Work At Sealdah Division

MI News Service, Kolkata, 12 Dec.25 : Due to maintenance work, 225 minutes (from 23:45 hrs. of 15.12.2025 to 03:30 hrs. of 16.12.2025) Traffic & Power Block on line no. 05 of Bridge no. 01 between Sealdah & Bidhan Nagar Road stations has been planned. Consequently, following arrangements in train running have been made as under: **Cancellation of train on 15.12.2025** : 31447 Sealdah – Naihati local• 31450 Naihati – Sealdah local. **Short termination / Short origination**: • 31542 Shantipur – Sealdah local will be

short terminated at Barrackpore on 15.12.2025. • 31511 Sealdah –Shantipur local will be short originated from Barrackpore on 16.12.2025. • 33858 Bangaon – Sealdah local will be short terminated at Dum Dum Cantonment on 15.12.2025. • 33815 Sealdah – Bangaon local will be short originated from Dum Dum Cantonment on 16.12.2025. Moreover, 53171 Sealdah – Lalgola passenger will leave Sealdah at 04:15 hrs. instead of 03:45 hrs. after the block cancelled on 16.12.2025.

PHYSICAL POSSESSION NOTICE

Branch Office : ICICI BANK LTD, BP-4, Technopolis Building, 4th Floor, Sector V, Salt Lake City, Kolkata, West Bengal- 700091
CIN No: L65190GJ1994PLC021012, www.icicibank.com

The Authorised ICICI Bank Officer under the Securitisation, Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 and in exercise of the powers conferred under section 13(12) read with Rule 3 of the Security Interest (Enforcement) Rules 2002, issued Demand Notices to the borrower(s) mentioned below, to repay the amount mentioned in the Notice within 60 days from the date of receipt of the said Notice.

Having failed to repay the amount, the Notice is issued to the borrower and the public in general that the undersigned has taken possession of the property described below, by exercising powers conferred on him/her under Section 13(4) of the said Act read with Rule 8 of the said rules on the below-mentioned dates. The borrower in particular and the public in general are hereby cautioned not to deal with the property. Any dealings with the property will be subject to charges of ICICI Bank Limited.

Sr. No.	Name of the Borrower(s)/ Loan Account Number	Description of Property/ Date of Physical Possession	Date of Demand Notice/ Amount in Demand Notice (Rs)	Name of Branch
1.	Santanu Rana/ Sarbeshwar Rana/ Kasba Egra East Midnapore Midnapore West Bengal Medinipur- 721429/ LBHOW00005323031. LBHOW00005323035	Dag No. 3288, Khatian No. 2132, J.L. No.23, Mouza Kasba Egra, P.S And Sub Registry Office Egra, Dist Medinipur, West Bengal, Admeasuring An Area of 8 2/5 Decimal/ Date of Physical 09/12/2025	September 28, 2022 Rs. 24,02,063.00/-	Egra

The above-mentioned borrower(s)/guarantor(s) is/are hereby issued a 30 day Notice to repay the amount, else the mortgaged properties will be sold after 30 days from the date of publishing this Notice, as per the provisions under Rules 8 and 9 of Security Interest (Enforcement) Rules 2002.

Date: December 12, 2025
Place: Egra

Sincerely Authorised Officer,
For ICICI Bank Ltd.

Y-chromosome impacts hereditary of digestive issues

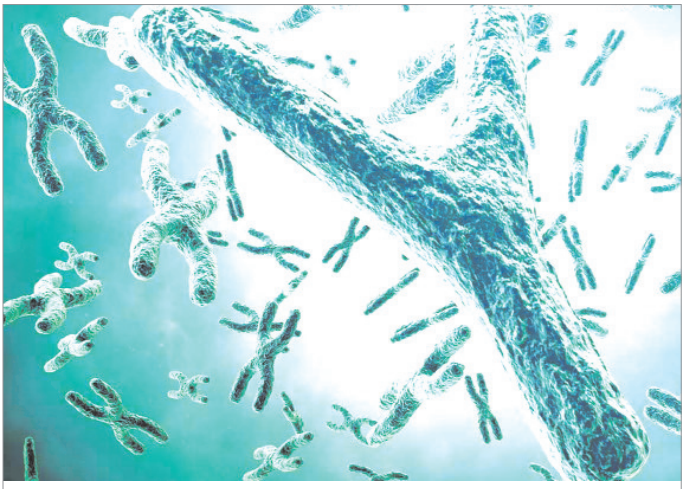

CALIFORNIA : A study suggests that the Y chromosome may impact the genetic basis of digestive diseases. The Y chromosome is responsible for important biological roles such as sex determination and male fertility.

The complete sequencing of the human Y chromosome is a tremendous step forward in human genetics, opening up new avenues for research into digestive disorders.

This milestone, when combined with developments in third-generation sequencing technologies, has the potential to change our understanding of the genetic underpinnings of digestive issues and pave the way for more personalised and effective treatment regimens.

The Y chromosome, the smallest of the human chromosomes, has long been shrouded in mystery due to its intricate repeating pattern.

Recent improvements in sequencing technologies, on the other hand, have enabled researchers to unearth the precise features of this genetic domain, offering insight into its role in sex determination and its potential

impact on a wide range of illnesses, notably those affecting the digestive system. The findings were published in the journal eGastroenterology. The completion of the Y chromosome sequence provides a comprehensive resource for detecting genetic variants that may contribute to digestive problems. This information is crucial for understanding the "missing heritability" problem, where the proportion of dis-

ease risk attributable to known genetic factors falls short of what is expected based on heritability estimates. With their ability to generate long, continuous DNA reads, third-generation sequencing technologies play a pivotal role in deciphering the complex genomic landscapes of digestive diseases. These technologies enable the detection of structural variations, such as copy number variations and inversions, which

were previously inaccessible using older sequencing methods. These structural variations may play a significant role in disease susceptibility and progression.

The combined power of complete Y chromosome sequencing and third-generation sequencing technologies holds immense promise for advancing digestive disease research.

By identifying novel genetic variants and elucidating their functional roles, researchers can better understand the mechanisms underlying digestive disorders and develop more targeted and effective therapies.

In addition to unravelling the genetic basis of digestive diseases, completing the Y chromosome sequence also opens up new opportunities for investigating sex-specific genetic effects.

Sex differences in disease susceptibility and progression are well-documented in many digestive disorders, yet the underlying genetic mechanisms remain largely unknown. With its unique genetic content and expression patterns, the Y chromosome may play a crucial role in these sex disparities.

Anti-rheumatic drugs may be able to prevent thyroid disease

MONTREAL, CANADA : Anti-rheumatic medications used to treat rheumatoid arthritis may help decrease the development of autoimmune thyroid illness, according to a new observational study.

The findings were reported in the Journal of Internal Medicine.

Rheumatoid arthritis patients are more likely to develop autoimmune thyroid diseases such as Hashimoto's disease and Graves' disease. Immunomodulatory drugs, which alter the immune system, are routinely used to treat RA patients, but they are rarely utilised to address autoimmune thyroid disorders.

Thyroid hormone is instead utilised to compensate for the defects in normal thyroid function caused by autoimmune thyroid illness.

The current study sought to determine whether immunomodulatory medicines that lower inflammation in the joints of RA patients could also lessen the chance of these patients acquiring autoimmune thyroid illness.

Previous research in mice suggests that DMARDs, a type of immune-modulatory medicine used to treat rheumatoid arthritis, can lower thyroid gland inflammation. According to the research team, knowledge of whether this impact also extends to humans is limited.

The researchers analysed data from over 13,000 patients with rheumatoid arthritis and their treatments between 2006 and 2018, as well as data from over 63,000 people in a matched control group who did not have rheumatoid arthritis.

The researchers discovered that the chance of acquiring an autoimmune thyroid illness in RA patients was lower after the disease's commencement than before diagnosis.

Patients with rheumatoid arthritis who were treated with immunomodulatory medications, or

'biological DMARDs,' had the greatest reduction in the incidence of autoimmune thyroid illness. The probability of autoimmune thyroid illness in these patients was 46% lower than in the control group without rheumatoid arthritis.

"These results support the hypothesis that certain types of immunomodulatory drugs could have a preventive effect on autoimmune thyroid disease," said Kristin Waldenlind, researcher at the Department of Medicine, Solna, Division of Clinical Epidemiology, Karolinska Institutet, specialist in rheumatology at Karolinska University Hospital and first author of the study.

"Our results do not prove that it is the treatment with immunomodulatory drugs that led to the reduced risk of autoimmune thyroid disease, but provide support for this hypothesis. The results, if they can be replicated in further studies, open up the possibility of studying more directly in clinical trials whether the immunomodulatory drugs currently used for rheumatoid arthritis could also be used for the early treatment of autoimmune thyroid disease, i.e. for new areas of use of these drugs, known as drug repurposing."

Study sheds light on antibiotic resistance, fitness landscapes

NEW MEXICO [US] : According to a recent study published in Science, E. coli bacteria may be significantly more capable of acquiring antibiotic resistance than scientists previously assumed.

Led by SFI External Professor Andreas Wagner, the researchers experimentally mapped more than 260,000 possible mutations of an E. coli protein that is essential for the bacteria's survival when exposed to the antibiotic trimethoprim.

Over the course of thousands of highly realistic digital simulations, the researchers then found that 75% of all possible evolutionary paths of the E. coli protein ultimately endowed the bacteria with such a high level of antibiotic resistance that a clinician would no longer give the antibiotic trimethoprim to a patient.

"In essence, this study suggests that bacteria like E. coli may be more adept at evolving resistance to antibiotics than we initially thought, and this has broader implications for understanding how various

systems in evolutionary biology, chemistry, and other fields adapt and evolve," says Wagner, an evolutionary biologist at the University of Zurich in Switzerland.

Besides uncovering new and potentially worrisome findings about antibiotic resistance, the researchers' work also casts doubt on a longstanding theory about fitness landscapes. These genetic maps represent how well an organism -- or a part of it, like a protein -- adapts to its environment.

On fitness landscapes, different points on the landscape represent different genotypes of an organism, and the height of these points represents how well each genotype is adapted to its environment. In evolutionary biology terms, the goal is to find the highest peak, which indicates the fittest genotype.

Prevailing theory regarding fitness landscapes predicts that in highly rugged landscapes, or those with multiple peaks of fitness, most evolving populations will become trapped at lower peaks and

never reach the pinnacle of evolutionary adaptation.

However, testing this theory has been exceedingly difficult until now due to the lack of experimental data on sufficiently large fitness landscapes.

To address this challenge, Wagner and colleagues used CRISPR gene editing technology to create one of the most combinatorially complete fitness landscapes to date for the E. coli dihydrofolate reductase (DHFR) protein.

What they found was surprising. The landscape had many peaks, but most were of low fitness, making them less interesting for adaptation. However, even in this rugged landscape, about 75% of the populations they simulated reached high fitness peaks, which would grant E. coli high antibiotic resistance.

The real-world implications are significant. If rugged landscapes like this are common in biological systems, it could mean that many adaptive processes, such as antibiotic resistance, may be more accessible than previously thought.

The result could ultimately lead to a re-evaluation of theoretical models in various fields and prompt further research into how real-world landscapes impact evolutionary processes.

"This has profound implications not only in biology but beyond, prompting us to reevaluate our understanding of landscape evolution across various fields," Wagner says. "We need to shift from abstract theoretical models to data-informed, realistic landscape models."

Poor eating choices are linked to poor mental health, risk of diabetes: Study

WASHINGTON DC : People with diabetes (Diabetes Mellitus) are two to three times more likely to suffer from depression than those who do not, according to the Centres for Disease Control.

Therapy, medicine, or both are currently available as treatment options. The scientific understanding of the multidimensional interplay between food, mental health, and diabetes, on the other hand, is still in its early phases.

The Mason researchers wanted to discover more about the relationship between nutrition, diabetes, and mental health.

According to two literature studies conducted by assistant professor Raedeh Basiri, poor nutrition plays a dual role in both the likelihood of acquiring Type 2 diabetes and the impact on mental health, including anxiety and sadness.

According to the findings, mental problems like depression and anxiety raise the likelihood of having Type 2 diabetes, and diabetes raises the risk of developing depression and anxiety. Nutritional therapies can help with both of these health problems.

"Our findings underscore the pivotal role of dietary choices in reducing the risks associated with both diabetes and mental health. The implications of these findings extend beyond the scientific community, as they hold promise for informing public health policies, health care practices, and dietary recommendations that can positively impact the general population, said Basiri, the lead author of the papers. "Ultimately, the research seeks to empower individuals to make informed and health-promoting dietary choices that can serve as a proactive strategy for the prevention and management of diabetes, as well as anxiety and depression," Basiri said. More specifically, the team's findings provide a comprehensive view of the relationship between dietary patterns, health outcomes, and the critical role of eating behaviour in the context of Type 2 diabetes and mental health. The team found that eating foods rich in fresh fruits and vegetables, whole grains, lean protein, and low-fat dairy is associated with a reduced risk of Type 2 diabetes and mental health disorders such as depression and anxiety. Conversely, a diet with a large number of processed foods was found to have a negative effect, increasing the susceptibility to type 2 diabetes, depression, and anxiety. Additionally, the research team found that a diet with energy-dense foods but lacking in essential nutrients, such as omega-3 fatty acids, vitamin D, vitamin E, vitamin B6, vitamin B12, folate, selenium, chromium, and magnesium, is associated.

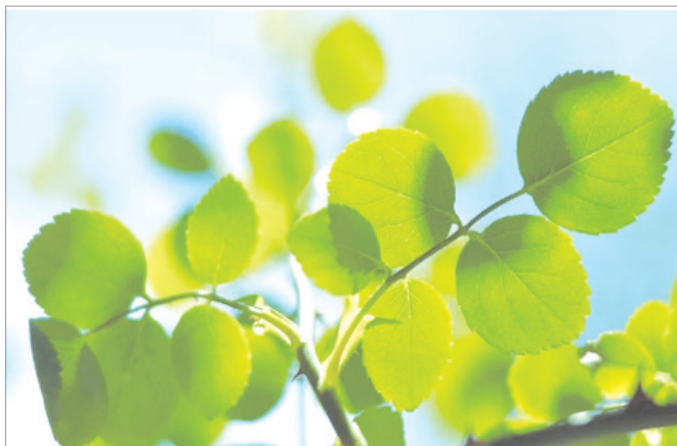

Research reveals how plants determine where light is coming from

WASHINGTON DC [US] : Plants lack visual organs, so how do they know where light comes from? In an original study combining expertise in biology and engineering, the team led by Prof Christian Fankhauser at UNIL, in collaboration with colleagues at EPFL, discovered that a light-sensitive plant tissue uses the optical properties of the interface between air and water to generate a light gradient that is 'visible' to the plant.

These results have been published in the journal Science.

The majority of living organisms (micro-organisms, plants and animals) have the ability to determine the origin of a light source, even in the absence of a sight organ comparable to the eye. This information is invaluable for orienting oneself or optimal positioning in the environment. Perceiving where light is coming from is particularly important for plants, which use this information to position their organs, a phenomenon known as phototropism. This enables them to capture more of the sun's rays, which they then convert into chemical energy through the process of photosynthesis, a vital process which is necessary for the production of nearly all of the food we eat.

Although the photoreceptor that initiates phototropism has long been known, the optical properties of photosensitive plant tissue have until now remained a mystery. A multidisciplinary study published in Science, combining the expertise of the teams of DrSc. Christian Fankhauser (full professor and director of the Integrative Genomics Centre in the Faculty of Biology and Medicine at UNIL), DrSc. Andreas Schuler (head of the Nanotechnology for Solar Energy Conversion group at EPFL's Solar Energy and Building Physics Laboratory) and UNIL's Electron Microscopy Centre uncovered a surprising tissue fea-

ture allowing plants to detect directional light cues. "It all started with the observation of a mutant of the model species Arabidopsis thaliana, the thale cress, whose stem was surprisingly 'transparent'," explains Christian Fankhauser, who led the research.

These plants failed to respond to light correctly. The UNIL biologist then decided to call on the skills of his colleague Andreas Schuler from EPFL, in order to further compare the specific optical properties of the mutant versus wild type samples. "We found that the natural milky appearance of the stems of young wild plants was in fact due to the presence of air in intercellular channels precisely located in various tissues. In the mutant specimens, the air is replaced by an aqueous liquid, giving them a translucent appearance", continues the researcher.

But what purpose do such air-filled channels serve? They enable the photosensitive stem to establish a light gradient that can be "read" by the plant. The plant can then determine the origin of the light source. This phenomenon is due to the different optical properties of air and water, which make up the majority of living tis-

sue. "More specifically, air and water have different refractive indices. This leads to light scattering as it passes through the seedling. We have all observed this phenomenon when admiring a rainbow", explains Martina Legris, a postdoctoral fellow in Prof Fankhauser's group and co-first author of the study.

Thanks to their research, the scientists have revealed a novel mechanism that enables living organisms to perceive where the light is coming from, enabling them to position their organs such as leaves in a way that optimizes light capture for photosynthesis. The study also provided a better understanding of the formation of air-filled intercellular channels, which have a range of functions in plants, in addition to the formation of light gradients. Among other uses, these channels promote gas exchange and also make it possible to resist hypoxia (reduction in the quantity of oxygen) in the event of flooding. Their development from the embryonic stage to adulthood, is still very poorly understood. Genetic resources used in this study will be useful to better understand the formation and maintenance of these intriguing structures.

Our sense of taste helps us pace our eating: Study

CALIFORNIA [US] : It has been generally held that when you eagerly dig into a long-awaited dinner, signals from your stomach to your brain keep you from eating so much you'll regret it. A team of scientists at UC San Francisco recently decided to test the theory and the picture, it turns out, is a little different.

The team, led by Zachary Knight, PhD, a UCSF professor of physiology in the Kavli Institute for Fundamental Neuroscience, discovered that it's our sense of taste that pulls us back from the brink of food inhalation on a hungry day.

Stimulated by the perception of flavour, a set of neurons - a type of brain cell - moves into action to curtail our food intake.

"We've uncovered a logic the brainstem uses to control how fast and how much we eat, using two different kinds of signals, one coming from the mouth, and one coming much later from the gut," said Knight, who is also an investigator with the Howard Hughes Medical Institute and a member of the UCSF Weill Institute for Neurosciences. "This discovery gives us a new framework to

understand how we control our eating." The study was published in Nature.

It could help reveal exactly how weight-loss drugs like Ozempic work, and how to make them more effective.

Pavlov proposed over a century ago that the sight, smell and taste of food are important for regulating digestion. More recent studies in the 1970s and 1980s have also suggested that the taste of food may restrain how fast we eat, but it's been impossible to study the relevant brain activity during eating because the brain cells that control this process are located deep in the brainstem, making them hard to access or record in an animal that's awake.

New techniques developed by lead author Truong Ly, PhD, a graduate student in Knight's lab, allowed for the first-ever imaging and recording of a brainstem structure critical for feeling full, called the nucleus of the solitary tract, or NTS, in an awake, active mouse. He used those techniques to look at two types of neurons that have been known for decades to have a role in food intake. The team found that when they

put food directly into the mouse's stomach, brain cells called PRLH (for prolactin-releasing hormone) were activated by nutrient signals sent from the GI tract, in line with traditional thinking

and the results of prior studies. However, when they allowed the mice to eat the food as they normally would, those signals from the gut didn't show up. Instead, the PRLH brain cells

switched to a new activity pattern that was entirely controlled by signals from the mouth.

"It was a total surprise that these cells were activated by the perception of taste," said Ly. "It shows that there are other components of the appetite-control system that we should be thinking about."

While it may seem counterintuitive for our brains to slow eating when we're hungry, the brain is actually using the taste of food in two different ways at the same time. One part is saying, "This tastes good, eat more," and another part is watching how fast you're eating and saying, "Slow down or you're going to be sick." "The balance between those is how fast you eat," said Knight.

The activity of the PRLH neurons seems to affect how palatable the mice found the food, Ly said. That meshes with our human experience that food is less appetizing once you've had your fill of it.

The PRLH-neuron-induced slowdown also makes sense in terms of timing. The taste of food triggers these neurons to

switch their activity in seconds, from keeping tabs on the gut to responding to signals from the mouth.

Meanwhile, it takes many minutes for a different group of brain cells, called CGC neurons, to begin responding to signals from the stomach and intestines. These cells act over much slower time scales - tens of minutes - and can hold back hunger for a much longer period of time.

"Together, these two sets of neurons create a feed-forward, feedback loop," said Knight. "One is using taste to slow things down and anticipate what's coming. The other is using a gut signal to say, 'This is how much I really ate. Ok, I'm full now!'" The CGC brain cells' response to stretch signals from the gut is to release GLP-1, the hormone mimicked by Ozempic, Wegovy and other new weight-loss drugs.

These drugs act on the same region of the brainstem that Ly's technology has finally allowed researchers to study. "Now we have a way of teasing apart what's happening in the brain that makes these drugs work," he said.

62 killed, 319 injured in Myanmar's Yangon-Mandalay highway accidents in 11 months

MI News Service, Yangon: A total of 62 people were killed and 319 were injured in 170 traffic accidents on Myanmar's Yangon-Mandalay highway between January and November this year, according to the highway traffic police force on Friday.

This marks a decrease in accidents, fatalities and injuries compared with the same period last year, which recorded 189 accidents, resulting in 87 deaths and 338 injuries, an official from the highway traffic police force told Xinhua. During this period, the traffic accidents also caused damage estimated at over 852 million kyats (about 405,714 U.S. dollars), he said.

The 587 km Yangon-Mandalay expressway connects the country's commercial city of Yangon and the second-largest city of Mandalay.

Israel strikes targets in southern, eastern Lebanon

MI News Service, Beirut: Israeli warplanes on Friday launched a series of airstrikes on several areas in eastern and southern Lebanon, according to the Lebanese National News Agency.

The agency reported that "enemy warplanes" conducted four airstrikes on the Al-Mahmoudieh and Al-Jarmaq areas, along with strikes on other areas in southern Lebanon. Additionally, four more airstrikes struck Wadi Zlaysia in western Bekaa, located in eastern Lebanon.

The Israeli army announced that it struck a Hezbollah "training and qualification compound" in southern Lebanon for the second time in a week.

Avichay Adraee, the Israeli army's spokesperson, said in a statement on the X platform that the army "struck a short while ago a training and qualification compound used by Hezbollah's Radwan Force to train and prepare its members."

The raids come as Israel continues its attacks on Lebanon despite a ceasefire agreement with Hezbollah, brokered by the United States and France, in effect since Nov. 27, 2024.

The Israeli army periodically carries out strikes in Lebanon, which it says are aimed at removing Hezbollah "threats," and maintains forces at five main points in the Lebanese border area.

Azam Khan acquitted in 2017 'anti-Army remark' case after eight-year trial

MI News Service, Rampur: In a significant legal and political victory, senior Samajwadi Party leader and former Uttar Pradesh minister Azam Khan was acquitted on Thursday by a special MP/MLA court in Rampur in a controversial 2017 case accusing him of making derogatory remarks against the Indian Army.

The case stemmed from a complaint filed on 30 June 2017 by BJP leader and current Rampur Sadar MLA Akash Saxena. Saxena alleged that during the 2017 Assembly election campaign, Khan, while addressing party workers at the Samajwadi Party office, made highly

objectionable comments insulting Indian soldiers.

An FIR was registered at Civil Lines police station, Rampur, and a chargesheet was subsequently filed. After nearly eight years of trial in the Special Magistrate Court for MP/MLA cases, the court ruled that the prosecution failed to produce sufficient evidence to prove the charges beyond reasonable doubt.

Examining witnesses, documents and arguments from both sides, the judge held that the allegations remained unsubstantiated, leading to Khan's clean acquittal. Khan appeared via video conferencing during the pronouncement.

Reacting to the verdict, Khan's counsel Mohammad Arfeen told reporters, "The case was completely baseless and politically motivated from day one.

The court has vindicated our stand that there was no credible evidence against Azam Khan. This acquittal exposes how false cases were foisted on him."

The verdict comes as a major relief for the veteran leader, who has faced over a hundred cases in recent years, many of them filed after the Yogi Adityanath government came to power in 2017. While Khan has secured acquittals in several matters, dozens of cases are still pending. Politically, the timing is crucial with Uttar Pradesh panchayat polls round the corner and assembly elections due in 2027.

The decision is expected to boost Samajwadi Party morale in Rampur and western UP, where Azam Khan, despite prolonged legal battles and imprisonment in some cases, continues to command significant influence among Muslim and backward community voters. — With Agencies Inputs

“Neither victims nor accused complaining”: Delhi HC slams outsiders’ pleas in 2020 riots cases

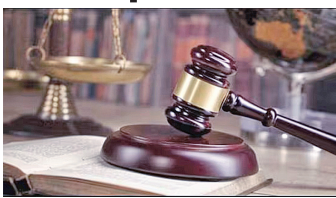

MI News Service, Delhi:

The Delhi High Court on Thursday strongly observed that neither the accused nor the victims of the February 2020 North-East Delhi riots have approached the court seeking reinvestigation or challenging the chargesheets filed by Delhi Police.

Instead, the pleas for a Special Investigation Team (SIT), commission of inquiry, fact-finding committee, or action against police and political leaders are being filed by “outsiders” with no direct stake. “Persons against whom charge sheets have been filed have not come to the court saying that the investigation is bad and it be reinvestigated. Neither the victims have come,”

It is the outsiders who are coming and making such prayers,” a Division Bench of Justices Vivek Chaudhary and Manoj Jain remarked while hearing a batch of petitions related to the riots. The court questioned why, in over five years, the petitioners had not approached the concerned magisterial courts with requests for further investigation or transfer of probe to another agency.

When Jamiat Ulama-i-Hind's counsel cited news reports and a Minority Commission report as evidence of alleged police bias, the Bench asked, “Show us that the police is partial. No victim has come forward and said so. Under which law can we take these news reports as evidence?”

The matter has been posted for further arguments on 15 December 2025. The 2020 riots, triggered amid protests against the Citizenship (Amendment) Act, claimed 53 lives and injured around 700 people.

Delhi Police have registered 757 FIRs, formed three SITs under the Crime Branch, and maintained that the violence was the result of a “well-planned conspiracy” rather than spontaneous clashes. They have denied any complicity by their personnel or evidence of instigation by political leaders. Pending petitions include demands for an NIA probe under UAPA, registration of FIRs against BJP leaders Anurag Thakur, Kapil Mishra, Parvesh Verma and Abhay Verma for alleged hate speeches, and counter-pleas seeking action against Congress leaders Sonia Gandhi, Rahul Gandhi, Priyanka Gandhi Vadra, AAP leaders, Umar Khalid, Harsh Mander, Swara Bhasker and others.

With investigation ongoing in 273 cases and trials pending in 250, the High Court's observations have put the spotlight on the locus standi of petitioners who are neither accused nor direct victims of the communal violence.

Railway Safety at Record High: Annual Accidents Reduce from 171 (2004–14 Avg.) to 11 in 2025–26 So Far

● **Safety Budget Grows Almost Three Times From 39,463 Crore in 2013-14 to 1,16,470 Crore in Current Fiscal**

● **Fog Safety Devices Rise 288 Times — From 90 in 2014 to 25,939 in 2025: Ashwini Vaishnaw**

● **Centralised Electronic Interlocking and Track-Circuiting Completed in 21 Stations Each Over the Last Four Months**

MI News Service, New Delhi, 12 Dec.25 : Safety and Security of passengers is accorded high priority on Indian Railways. Any unusual incident is thoroughly investigated by the Railway Administration. Wherever any reason other than technical reason is suspected, the help of State Police is taken.

In some cases, the guidance of Central Bureau of Investigation (CBI) and National Investigation Agency (NIA) is also sought. However, the primary means of investigation is through the State Police. This is in line with the constitutional arrangements under which the investigation of criminal activity, maintenance of Law and Order and security of railway infrastructure i.e. tracks, bridges, tunnels etc. is responsibility of the State Government.

In all incidents of sabotage/tampering with railway track reported in 2023 and 2024, cases have been registered by Police/GRP of states and other law enforcement agencies followed by investigation, arrest of offenders and their prosecution.

The following steps are being taken by Railways for better coordination with State Police/GRP, for coordinated action to prevent such incidents and its monitoring :-

● Frequent patrolling of identified black spots and vulnerable sections are being jointly done by Rail-

waymen, RPF, GRP & Civil Police.

● Special teams are formed to patrol high-risk areas, vulnerable sections and sharing of intelligence to mitigate threats effectively.

● Regular drives are conducted to remove material lying near to the railway tracks which can potentially be used by miscreants for obstruction by putting those materials on railway track.

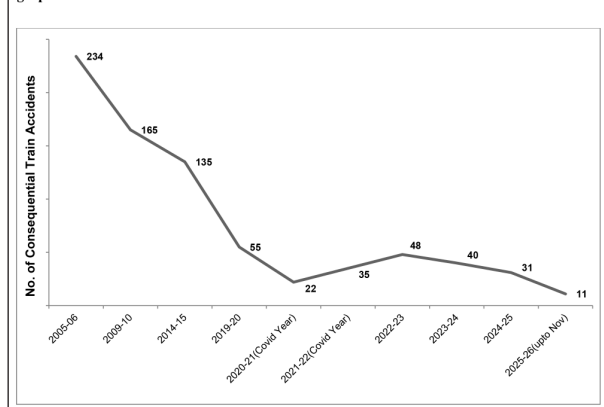

● The people living near railway track are being sensitized about the consequences of putting foreign material on track, removing rail components

as well as on running trains with focus on sabotage incidents, sharing of intelligence.

Effective steps are being undertaken to prevent such incidents. In addition to above, specialized agencies such as NIA, CBI are also involved as per the scenario.

● Besides Central & State Intelligence agencies, Intelligence unit of RPF i.e. CIB & SIB regularly sensitized and instructed to collect intelligence and take necessary action in coordination with Police authorities for detection and prevention of sabotage attempts.

The number of consequential train accidents during the last five years is depicted in the graph below:-

etc. and are requested to keep watch and report any suspected activity immediately.

● State Level Security Committee of Railways (SLSCR) meetings are being conducted, which have been constituted in each State under the chairmanship of DGSP/Commissioner of Police of respective States/Union territory with representatives of RPF, GRP and Intelligence units. Close liaison is actively made by RPF with the State Police/GRP authorities at all levels to control Crime, registration of cases, their investigation and maintenance of Law & Order in Railway premises

To improve Safety in train operations, several measures have been taken by Indian Railways. As a consequence of various safety measures taken over the years, there has been a steep decline in the number of accidents. Consequential Train Accidents have reduced from 135 in 2014-15 to 31 in 2024-25 as shown in the graph below.

It may be noted that the Consequential Train Accidents during the period 2004-14 was 1711 (average 171 per annum), which has declined to 31 in 2024-25 and further to 11 in 2025-26 (upto November, 2025).

SC stays “not Waqf” declaration in Munambam case; rebukes High Court for overreach

MI News Service, New Delhi: In a significant interim order on Friday, the Supreme Court stayed the Kerala High Court's declaration that the 404.76-acre Munambam land in Ernakulam district is not Waqf property.

A Bench of Justices Manoj Misra and Ujjal Bhuyan directed that status quo be maintained until the next hearing in the week commencing 27 January 2026, while issuing notice in the Special Leave Petition (SLP) filed by Kerala Waqf Samrakshana Vedi.

The dispute originated from a 1950 deed by Mohammed Sidhique Sait transferring the land to the Farook College Managing Committee. For decades, portions were sold to individuals, many from the Christian community, who built homes there.

In 2019, the Kerala State Waqf Board suddenly declared the entire tract Waqf property, claiming the 1950 deed created a Waqf rather than an ordinary gift. This triggered widespread protests and became a rallying point during the passage of the Waqf (Amendment) Act, 2025.

The Kerala Government appointed a one-member Commission of Inquiry under retired Justice C.N. Ramachandran Nair to examine the land's status.

When the Commission was challenged, a Single Judge of the High Court quashed it, holding that only the Waqf Tribunal has jurisdiction. However, a Division Bench overturned this, restored the Commission, and went further by declaring the land was not Waqf property at all.

The Supreme Court strongly disapproved of the Division Bench “travelling far beyond” the scope of the writ petition, which only challenged the Commission's formation.

Senior Advocate Huzefa Ahmadi, appearing for the petitioner, argued that interpreting the 1950 deed and determining

whether it created a valid Waqf falls exclusively within the Waqf Tribunal's jurisdiction, especially since related suits are pending there.

He highlighted that a 1967 civil court decree (upheld by the High Court in 1973) had already held the deed to be a Waqf, and Farook College never challenged it. The Bench agreed that the High Court should have simply dismissed the writ as non-maintainable instead of making sweeping factual declarations no party had sought.

Importantly, the Court did not stay the High Court's finding upholding the State's right to constitute the Commission; only the declaration that the land is “not Waqf” has been stayed.

Residents, represented by Senior Advocates V. Chitambaresh and Maninder Singh, opposed the SLP, claiming decades of possession and prior civil decrees in their favour. The State argued the petitioner was a third party and the actual mutawalli had not objected.

With the High Court's “not Waqf” declaration now suspended, the land remains notified as Waqf property for the time being.

Union Minister Kiren Rijiju has already clarified that even the new Waqf Amendment Act will not retrospectively resolve the Munambam dispute, leaving the residents to fight their battle in the Supreme Court.

The case will now be heard after 27 January 2026, when the Court is expected to decide the larger questions of jurisdiction between High Courts, Waqf Tribunals, and Commissions of Inquiry in such disputes. — With Agencies Inputs

Eastern Railway Conducts Awareness Meeting on Do's & Don'ts of Track Maintenance

MI News Service, Kolkata, 12 Dec.25 :

On 12th December 2025 (Friday), Eastern Railway organized a comprehensive awareness meeting on “Do's & Don'ts of Track Maintenance” at the New Conference Hall, 1st Floor, Eastern Railway Headquarters, Kolkata. The session was attended by all B & C category SSE/JEP/Way officials from various divisions. These categories had been finalized earlier based on the work experience & knowledge. The program aimed to enhance understanding of critical safety aspects related to track maintenance and to reinforce best practices among field engineers. The meeting was held in the esteemed presence of the Principal Chief Engineer, Eastern Railway, along with other senior Heads of the Engineering Department.

The gathering was also addressed by Shri Milind Deouskar, General Manager, Eastern Railway, who emphasized the importance of

continuous learning, adherence to safety guidelines, and maintaining high standards in track maintenance to ensure smooth and safe train operations.

On this occasion, a booklet on the Do's & Don'ts of important track maintenance works was formally released by Shri Milind Deouskar. The booklet includes a dedicated one-page Do's & Don'ts section for each key maintenance item, designed to serve as a ready reference for field supervisors and engineers. Eastern Railway remains committed to promoting safety, improving operational reliability, and strengthening the knowledge base of its engineering workforce through regular training and awareness initiatives.

UP court grants conditional bail to Taqueer Raza in Bareilly riots

MI News Service, Bareilly: A court in Bareilly on Thursday granted conditional bail to Ittehad-e-Millat Council chief Maulana Taqueer Raza Khan and one another, accused of instigating violence in Uttar Pradesh's over “I Love Muhammad” posters, on furnishing a bond of Rs 1 lakh each.

Sub-inspector Komal Kundu of the Mahila Police station had registered a case against Taqueer Raza, Nadeem, and others on September 26. Additional District Government Counsel (ADGC) Mahesh Singh Yadav on Friday said that both the accused had applied for a bail through their lawyers in the court of Special Judge (E C Act) Amrita Shukla. While granting conditional bail, the court stated that the accused will not be able to leave the city without the permission of the investigating officer. If the accused do not cooperate with the investigation, the investigating officer will have the right to file an application in court to revoke their bail, he said.

Maulana Taqueer Raza has been granted bail in four cases so far, but he will remain in jail, as his bail is

still pending in six other cases, he said. Violence in Bareilly had allegedly erupted on September 26 over a dispute linked to “I Love Muhammad” posters.

According to police, mobs gathered at several locations in the city, hurled petrol bombs at police personnel, resorted to stone-pelting and firing, and looted weapons including a riot-control gun. More than two dozen police personnel were injured in the unrest.

That night, 10 cases were registered across Kotwali, Baradari, Premnagar, Cantt and Qila police stations. Investigations in two key cases registered at Kotwali and Baradari were later transferred to the crime branch.

Police said 19 accused were initially named in the case, while 55 more names surfaced during the probe. Of these, a chargesheet has been filed against 38 accused along with evidence.

Raza is currently lodged in Fatehgarh jail, while Nafees and several other accused are lodged in Bareilly jail, police added.

Hamas says it accepts possible int'l force in Gaza for ceasefire monitoring only

MI News Service, GAZA:

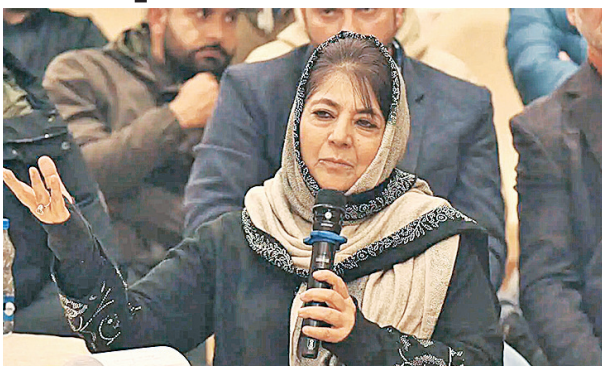

senior Hamas official said Thursday that Palestinian factions in Gaza have given initial approval for a potential international force in the territory, provided its mandate is limited to “monitoring the ceasefire and maintaining a presence along the borders to separate the two sides.” Husam Badran, a member of Hamas' political bureau, told Xinhua that the force's role should remain “limited, clear, and agreed upon,” and must not undermine Palestinian national decision-making. He noted that most countries discussing the idea stressed the need for Palestinian consent before deployment. Badran is referring to the International Stabilization Force, a proposed multinational force endorsed as part of a broader peace plan and a UN Security Council resolution in November.

3.55 lakh Waqf properties missing from UMEED portal: Mehbooba Mufti

MI News Service, Srinagar: Former Jammu and Kashmir Chief Minister and Peoples Democratic Party (PDP) chief Mehbooba Mufti has alleged that, according to the new UMEED database, 3.55 lakh Waqf properties are ‘missing’ nationwide.

Mehbooba Mufti said on X on Friday, “Over 3.55 lakh Waqf properties are missing nationwide with J&K alone losing 7,240 entries in the new UMEED database. These gaps raise serious questions about transparency and protection of Waqf assets. With a pattern of violence, demolitions and disenfranchisement the erosion of Waqf land feels like the latest blow against the Muslims .Where does this end?”

She also attached a screenshot of the new

UMEED database, which shows the difference between figures posted on December 9, 2024 and December 6, 2025.

The UMEED database shows the difference between the Waqf properties as they existed last year and this year.

According to the screenshot posted by Mufti, except for Maha-

rastra, Andaman & Nicobar islands, Delhi, Bihar and Telangana, where the Waqf properties show an increase over last year, all other states and union territories show a negative difference, conveying an impression about the Waqf properties having drastically been reduced in one year. The highest increase in these properties is

Sunni Waqf properties in Bihar have increased by 3117, while Shia Muslim Waqf properties have increased by 3,470 over the last year. The maximum ‘disappearance’ is shown in the Waqf properties of Uttar Pradesh, and the minimum by Chandigarh.

In Uttar Pradesh, Shia Muslim Waqf properties have come down by 8,901, and Sunni Muslim Waqf properties have been reduced by 1,30,816. In the case of Jammu and Kashmir, the Waqf properties have come down by 7,240.

U19 Asia Cup: Vaibhav Sooryavanshi's 171 sets up India's huge win over UAE

DUBAI : Vaibhav Sooryavanshi's blistering 171 off 95 balls powered India U19 to a commanding 234 run victory over UAE U19 in their Asia Cup opener at the ICC Academy on Friday.

Apart from Suryavanshi's spectacular knock, Aaron George (69) and Vihaan Malhotra (69) contributed with crucial half-centuries. Vedant Trivedi (38), Abhigyan Kundu (32) and Kanishk Chouhan (28) provided the finishing touches to India U19 posting a massive 433/6, the highest score in tournament's history.

It's also India's highest total in U19 ODIs and the third highest ever score in men's U19 one day cricket. Suryavanshi's knock was laced with nine fours and 14 sixes coming at a strike rate of 180. He brought up his half-century in 30 balls, before getting his century in just 56 deliveries and reaching his 150 in 84 balls.

His 14 sixes are the most by

any batter in the tournament's history, going past Afghanistan's Darwish Rasooli who struck 10 against UAE in 2017. In reply, UAE made 199/7 in 50 overs, with Uddish Suri's unbeaten 78 and Prithvi Madhu's fifty being the lone resistance acts for the hosts. India U19 will next face Pakistan U19 in their group stage clash on Sunday.

Meanwhile, Pakistan U19 launched their campaign with a crushing 297 run win over Malaysia at The Sevens Stadium. Centuries from Ahmed Hussain and debutant Sameer Minhas powered the side to 345/3 before the bowlers bundled Malaysia out for just 48 in 19.4 overs.

Minhas was the star of the show with an unbeaten 177 off 148 balls, striking 11 fours and eight sixes to claim the Player of the Match honour. He shared a mammoth 293 run stand with Hussain, who made 132 off 114

deliveries, and ensured Pakistan's dominance from the outset.

Malaysia never recovered from early blows in the chase, as Ali Raza struck with the new ball to finish with 3-11, while Mohammad Sayyam also took three wickets and Daniyal Ali Khan and Niqab Shafiq chipped in to complete a resounding win for Pakistan U19.

Brief Scores: India U19 433/6 in 50 overs (Vaibhav Suryavanshi 171, Vihaan Malhotra 69; Yug Sharma 2-75, Uddish Suri 2-77) beat UAE U19 199/7 in 50 overs (Uddish Suri 78 not out, Prithvi Madhu 50; Deepesh Devendran 2/21, Henil Patel 1/31) by 234 runs

Pakistan 345/3 in 50 overs (Sameer Minhas 177 not out, Ahmed Hussain 132; Nagineswaran Sathnakumaran 2-91) beat Malaysia 48 all out in 19.4 overs (Deaaz Patro 9; Ali Raza 3-11, Mohammad Sayyam 3-27) by 297 runs

Vinesh Phogat reverses retirement, says 'stepping back toward LA28'

NEW DELHI : India's ace wrestler Vinesh Phogat, who announced her retirement hours after her disqualification from the Paris Olympics 2024, has reversed her decision to retire and announced that she would return to the mat as she set her sights on the 2028 Los Angeles Olympics.

Vinesh took to social media on Friday to announce her decision that "I still want to compete" with a heart "that's unafraid and a spirit that refuses to bow."

"People kept asking if Paris was the end. For a long time, I didn't have the answer. I needed to step away from the mat, from the pressure, from the expectations, even from my own ambitions," Vinesh said in a statement.

"For the first time in years, I allowed myself to breathe. I took time to understand the weight of my journey: the highs, the heartbreaks, the sacrifices, the versions of me the world never saw. And somewhere in that reflection, I found the truth, I still love this sport. I still want to compete."

"In that silence, I found something I'd forgotten: 'the fire never left'. It was only buried under exhaustion and noise. The discipline, the routine, the fight... it's in my system. No matter how far I walked away, a part of me stayed on the mat."

"So here I am, stepping back toward LA28 with a heart that's unafraid and a spirit that refuses to bow. And this time, I'm not walking alone; my son is joining my team, my biggest motivation, my little cheerleader on this road to the LA Olympics."

Vinesh made history in Paris by becoming the first Indian woman wrestler to reach the final at the Olympics. Her landmark run included a stunning win over Japan's four-time world champion Yui Susaki.

But her redemption story, following a disappointing performance in the Tokyo Olympics, ended in heartbreak as she was disqualified from the competition after she was found overweight in the second weigh-in on the morning of the final.

However, she appealed against her Olympic disqualification with the Court of Arbitration for Sports (CAS) and demanded a joint silver medal in the 50kg weight category.

But, the Ad-Hoc Division of the CAS dismissed Vinesh's petition against her disqualification, shattering her dream of clinching her maiden Olympic medal.

Later, Vinesh along with Bajrang Punia, joined the Congress in the run-up to the 2024 Haryana Assembly elections, where she won from the Julana constituency in Jind, defeating the BJP's Yogesh Bajrang.

SMAT: Haryana defeats Rajasthan, Kushagra helps Jharkhand chase down 236 against Punjab

PUNE : Haryana opened their Syed Mushtaq Ali Trophy Super League campaign with a commanding seven wicket win over Rajasthan, while Kumar Kushagra slammed an unbeaten 86 to help Jharkhand chase down a massive 236 against a formidable Punjab.

At the MCA Stadium, fast bowlers Anshul Kamboj and Ishant Bhardwaj set the tone by sharing four wickets between themselves to restrict Rajasthan to 132/8. In reply, captain Ankit Kumar's fluent 41 ball 60 sealed the chase with 22 balls to spare.

After electing to field first, Haryana made immediate inroads as Rajasthan lost four wickets inside the PowerPlay. Kunal Singh Rathore fell cheaply, while Deepak Hooda was run out without scoring in bizarre fashion.

Shubham Garhwal's 33 and Mahipal Lomror's unbeaten 37

offered resistance, while Rahul Chahar chipped in with 20 runs down the order. But the innings never recovered from the early collapse. Kamboj and Bhardwaj finished with identical figures of 2-24.

Chasing 133, Haryana's top order ensured there were no early setbacks. Ankit forged stands of 37, 52 and 40 with Aarsh Ranga, Yashvardhan Dalal and Himanshu Rana to keep the scoreboard moving. His knock, laced with eight fours and a six, was his third fifty of the tournament as Haryana cruised home in a modest chase.

Meanwhile, at the DY Patil Academy in Ambli, Jharkhand scripted history by overhauling Punjab's 235/6 and set a new record for the highest ever chase in the history of the competition. Kushagra's unbeaten 86 came off 42 balls, as Jharkhand romped home with six wickets in

hand and 11 balls to spare.

Punjab's innings was built around a blistering knock from wicketkeeper batter Salil Arora, who smashed 125 off just 45 deliveries, including reaching his hundred in 39 balls. After his fireworks, Jharkhand's response was equally emphatic.

Skipper Ishan Kishan struck 47 off 23 balls to set the tone for the successful chase, before Kushagra stitched crucial partnerships with him, Anukul Roy and Pankaj Kumar to secure Jharkhand's eighth consecutive win in the tournament.

Brief Scores: Rajasthan 132/8 in 20 overs (Mahipal Lomror 37 not out, Shubham Garhwal 33; Anshul Kamboj 2-24, Ishant Bhardwaj 2-24) lost to Haryana 133/3 in 16.2 overs (Ankit Kumar 60, Arsh Ranga 27; Rahul Chahar 1-17) by seven wickets.

SMAT: Haryana defeats Rajasthan, Kushagra helps Jharkhand chase down 236 against Punjab

AT THE MCA STADIUM, FAST BOWLERS ANSHUL KAMBOJ AND ISHANT BHARDWAJ SET THE TONE BY SHARING FOUR WICKETS BETWEEN THEMSELVES TO RESTRICT RAJASTHAN TO 132/8.

Meanwhile, at the DY Patil Academy in Ambli, Jharkhand scripted history by overhauling Punjab's 235/6 and set a new record for the highest ever chase in the history of the competition. Kushagra's unbeaten 86 came off 42 balls, as Jharkhand romped home with six wickets in hand and 11 balls to spare. Punjab's innings was built

around a blistering knock from wicketkeeper batter Salil Arora, who smashed 125 off just 45 deliveries, including reaching his hundred in 39 balls. After his fireworks, Jharkhand's response was equally emphatic.

Skipper Ishan Kishan struck 47 off 23 balls to set the tone for the successful chase, before Kushagra stitched crucial partnerships with him, Anukul Roy and Pankaj Kumar to secure Jharkhand's eighth consecutive win in the tournament.

Brief Scores: Rajasthan 132/8 in 20 overs (Mahipal Lomror 37 not out, Shubham Garhwal 33; Anshul Kamboj 2-24, Ishant Bhardwaj 2-24) lost to Haryana 133/3 in 16.2 overs (Ankit Kumar 60, Arsh Ranga 27; Rahul Chahar 1-17) by seven wickets

Punjab 235/6 in 20 overs (Salil Arora 125 not out, Naman Dhir 27; Sushant Mishra 2-47, Bal Krishna 2-66) lost to Jharkhand 237/4 in 18.1 overs (Kumar Kushagra 86, Ishan Kishan 47; Ramandeep Singh 1-37, Sanvir Singh 1-40) by six wickets

Neser and Lehmann to join Hampshire for next year's county championship

SOUTHAMPTON : Australia duo Michael Nesar and Jake Lehmann will join Hampshire for the 2026 County Championship season. Nesar, fresh from taking a five-wicket haul in the recent Ashes win in Brisbane, is set to feature in the first six Championship matches before the T20 Blast.

Nesar, 35, took 13 wickets for Hampshire in 2024 across eight matches in the county championship and T20 blast. "In Michael Nesar and Jake Lehmann, we have two players who have the ability to make a significant impact. Michael brings valuable runs alongside his quality with the ball - he will partner Kyle Abbott as one of our overseas players," said Giles White, Director of Cricket at Hampshire, in a statement.

Meanwhile, Lehmann, the son of former Australia player and current Northamptonshire head coach Darren Lehmann, has signed a two year all-format deal with the club. He has scored 5,684 runs in 97 first-class cricket games for South Australia with 16 centuries against his name.

In the ongoing Sheffield Shield, Lehmann is South Australia's leading

run scorer and has the third-most runs of anyone in the competition with 426 runs. He has also scored two centuries and one fifty (96 v Western Australia) in his ten innings so far.

"Jake is in outstanding form and is the leading run scorer in Shield cricket over the past 18 months. With a British passport, he is eligible to play as a locally qualified player, allowing flex in strengthening the squad. Both players possess a great attitude and bring quality and experience; it's a great boost as we look to finalise our plans ahead of 2026," added White.

Last season, Lehmann scored 750 runs, including a century in the final, to take South Australia to their first Sheffield Shield title since 1995/96. He has previously featured in eight county matches across short stints with Yorkshire in 2016, where he averaged 54.85, and Lancashire in 2019; he scored 419 runs with two fifties and one hundred.

"I'm excited to join Hampshire on a two-year deal, it's great to return to county cricket. Hampshire has a fantastic history of Australian players and to follow in the footsteps of Shane Warne, Matthew Hayden and the like is really special. I look forward to joining up with the team at Utilita Bowl and hopefully contributing to the trophy cabinet," added Lehmann.

PKL HONOUR INDIAN WOMEN'S KABADDI WC WINNERS

MUMBAI : The Indian women's kabaddi team was felicitated by the Pro Kabaddi League (PKL) on Friday after their triumphant return from Dhaka, Bangladesh, where they clinched the Women's Kabaddi World Cup on November 24. India defeated Chinese Taipei 35-28 in the final to secure their second consecutive World Cup title, reaffirming their dominance in the sport.

India remained unbeaten through the tournament, sweeping all their group matches before defeating Iran 33-21 in the semi-final. Chinese Taipei, also unbeaten in their group, entered the final after overcoming hosts Bangladesh 25-18.

PKL chairman and business head of Mashal Sports, Anupam Goswami, underlined the long-term vision for women's kabaddi, "The federation's commitment - especially in bringing back the Women's World Cup after 12 years shows that the sport is moving firmly in the right direction. This World Cup trophy is more than a win; it is a shared responsibility for all of us as we look ahead."

"When we think about a Women's

Kabaddi League, rushing it isn't the answer. We need to build it the right way - with players who truly want to be part of it, with a model that makes commercial sense, and with a structure that can support women's kabaddi for the long run", he added.

Head coach V. Tejeswini Bai highlighted the team's evolution and preparation, saying, "This is the third time I've been part of a coaching setup that has won a medal, and every single one of them feels incredibly special. I'm proud

not just of the result, but of the journey this group has taken... What you're seeing in this victory is the result of months and months of disciplined preparation."

Skipper Ritu Negi spoke about the team's unity and resolve, said, "In the last match I wasn't able to play much because of my injury, and of course that was frustrating.

But our team is bigger than any one player. What matters is that our players stepped up and executed exactly what was needed.
